

NEERLY

Water, sorted.

User Flows — UX Handoff

Version 2.0 — Deep Edition

*Every screen. Every element. Every copy string.
Every edge case. Every error.*

Supersedes User Flows v1.0 — that document is deprecated.

For: UX Designers, Content Writers, Developers, QA

Contents

Part A — Foundations

1. How to Use This Document
2. Copy Conventions & Tone
3. Design Patterns & Components
4. Screen Naming Conventions
5. Shared UI Strings (Errors, Empty States, Loading)

Part B — Entry & Authentication

6. App Launch & Entry Points
7. Customer Registration (New User)
8. Vendor Registration — Tier-1
9. Vendor Registration — Tier-2
10. Driver Registration & Onboarding
11. Login (All Roles — Returning Users)
12. Role Selection, Switching & Multi-Role
13. Admin-Light Mobile Access

Part C — Customer App

14. Home & Browse
15. Vendor Detail & Product
16. Cart & Checkout
17. Order Tracking
18. Order History & Detail
19. Subscriptions
20. Returns & Deposits
21. Wallet
22. Profile & Settings
23. Reviews & Complaints

Part D — Vendor App

24. Vendor Dashboard
25. Incoming Order (3-Min Acceptance)
26. Order Management
27. Catalog Management
28. Team & Drivers
29. Subscription Today-List

30. Returns, Pickups & Damage Claims

31. Earnings & Payouts

32. Business Settings

33. Compliance

Part E — Driver App

34. Driver Home & Shift

35. Delivery Execution

36. Return Pickup

37. COD Reconciliation

Part F — Admin-Light Mobile

38. Admin Dashboard (Mobile)

39. Mobile Admin Tasks

Part G — Cross-Cutting

40. Notifications (All Roles)

41. Help & Support

42. Global Navigation Maps

1. How to Use This Document

1.1 Who This Is For

Primary audience: UX designers creating wireframes and high-fidelity designs for the Neerly Android app. Secondary audience: content writers refining copy, developers implementing screens, QA engineers building test cases.

1.2 What's New in V2.0

- Full suggested copy for every element (headers, subtitles, buttons, placeholder text, help text)
- All error messages verbatim for every validation and edge case
- Admin-light mobile flows added (previously out of scope)
- Expanded empty-state and loading-state treatment for every screen
- Accessibility notes where critical (contrast, touch targets, screen reader hints)
- API call annotations so developers know which endpoint backs each action

1.3 How to Read a Screen Entry

Every screen follows this template:  SCREEN ID

 Entry from / Exit to		 Elements (with copy)		Title + purpose	
 Validations		 API calls			
 Loading states		 Error states			
 Empty states		 Edge cases			
 Accessibility notes					

1.4 Copy Convention in This Document

- Copy strings are shown in "double quotes" — use verbatim
- Placeholders in angle brackets: "<vendor name>", "<amount>", "<date>"
- Primary language: English; Telugu translations as TODO for content team
- Use sentence case (not Title Case) — more natural, less formal
- Use contractions ('you're', 'we'll') — more conversational
- Numbers in digits (not words) except beginning of sentence

1.5 Cross-Reference Lookups

Every screen has a unique ID. To find a screen:

- Search this PDF for the ID (e.g., 'S-CUST-REG-02')
- Or look in the navigation map (Section 42)
- Or scan the contents for the relevant section

2. Copy Conventions & Tone

2.1 Brand Voice

- Friendly but professional — like a helpful shopkeeper
- Confident, not apologetic
- Clear over clever — avoid jargon and cutesy phrases
- Respectful of user's time — short sentences, scannable
- Warm but not saccharine

2.2 Do's

- "Order placed!" not "Your order has been successfully placed"
- "Try again" not "Please try again"
- "Delivery photo required" not "Kindly capture the delivery photograph"
- "Address saved" not "Your address has been saved successfully"

2.3 Don'ts

- Avoid 'Please' everywhere — use sparingly for genuine apology
- Avoid 'Kindly' — too formal for mobile
- Avoid 'successfully' — it's noise; if we're showing the message, it succeeded
- Avoid exclamation marks except for genuine celebration (order placed, subscription created)
- Avoid 'Oops' or similar — feels infantilizing in serious contexts (payment failures)

2.4 Error Message Format

Every error message answers three questions:

- What happened? (in one short phrase)
- Why? (if useful to user)
- What can they do? (action to take)

Examples:

BAD: "Error: Transaction failed. Code 402." GOOD: "Payment failed. Your card was declined — try another payment method." BAD: "An error occurred. Please try again." GOOD: "Couldn't place order. Check your connection and retry." BAD: "Invalid input." GOOD: "Phone number should start with 6, 7, 8, or 9."

2.5 Button Copy

- Action verbs always: "Send OTP" not "OTP"
- Primary CTAs are specific: "Pay ₹845" not "Pay now"
- Destructive actions: red color + clear verb: "Delete" not "Remove" (when permanent)

- Cancel/back buttons: "Cancel" for decisions, "Back" for navigation
- Avoid "Submit" — use the actual action: "Create account", "Place order", "Send invite"

2.6 Empty State Copy

Every empty state has:

- Why it's empty (not accusatory, just factual)
- What user can do about it (CTA)
- Illustration tone: friendly, not sad

Examples:

No orders yet: "No orders yet" "Start by browsing vendors near you" CTA: "Browse vendors"
No addresses saved: "No saved addresses" "Save an address to order faster next time" CTA: "Add address"

2.7 Confirmation Copy

- Success toasts are short: "Address saved", "Review posted"
- Destructive confirmations spell out consequence: "Delete this address? Active orders using it will not be affected."
- Irreversible actions include word "permanent": "Account deletion is permanent after 30 days"

2.8 Regional Sensitivity

- Avoid westernisms (no "awesome", "rockstar")
- Amounts in Indian format: ₹1,45,000 (not ₹145,000)
- Dates default to DD/MM/YYYY in display; ISO in backend
- Times in 12-hour with AM/PM
- Address order: flat → building → street → area → city → pincode

3. Design Patterns & Components

3.1 Core Principles

P1 — Thumb-first

- Primary CTAs at bottom; back arrow at top-left
- Critical actions within bottom 40% of screen
- Long forms use progressive disclosure, not scroll-to-bottom

P2 — Transparent

- All fees shown upfront at cart, not surprise at payment
- Delivery time shown honestly (include buffer, don't under-promise)
- Surge multiplier disclosed as distinct line item

P3 — Low literacy friendly

- Every icon paired with label for critical actions
- Numeric keyboards for phone/OTP/amount inputs
- Audio cues for vendor/driver alerts (not silent UI)
- Language switcher top-right, always accessible

P4 — Network-aware

- Offline banner at top when disconnected
- Cached lists still usable offline (greyed out)
- Form drafts saved locally; restore on return
- Photo uploads in background, retry on failure

P5 — Role-aware accent colors

- Customer: blue (#2E75B6)
- Vendor: teal (#17A2B8)
- Driver: orange (#F07820)
- Admin: purple (#7B2CBF)
- Role indicator visible in every top bar

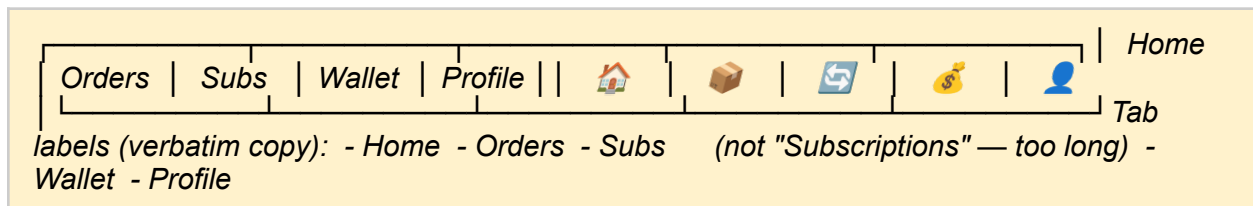

3.2 Component Library

Component	Purpose	When Used
Bottom sheet	Secondary actions, filters, confirmations	Address picker, filters, product details
Full modal	Critical decisions, photo capture	Delete confirmation, new-order alert
Inline error	Form validation feedback	Below input fields

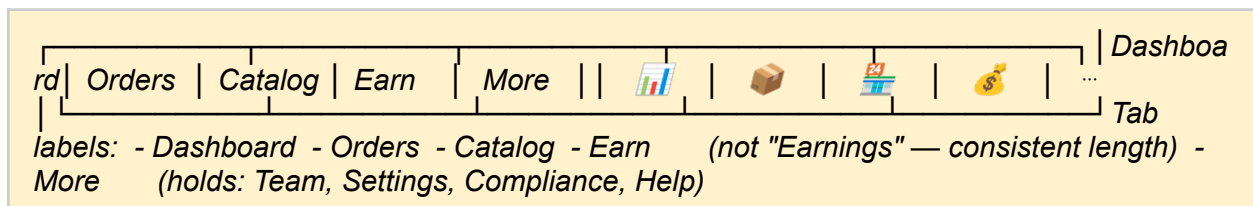

Component	Purpose	When Used
Toast (snackbar)	Non-critical success/info	"Added to cart", "Review posted"
Banner (persistent)	System state info	Offline mode, surge active, account suspended
Pull-to-refresh	Refreshable lists	Orders, reviews, deposits
Infinite scroll	Long paginated lists	Order history, reviews
Skeleton loader	Loading placeholder	All list loads, not spinners
Empty state	Zero-data state	Empty cart, no orders yet
Progress stepper	Multi-step flow indicator	Registration, checkout, tracking
Status pill	Entity status label	Order status, vendor status
Floating action button	Primary add action	Add address, new subscription

3.3 Global Navigation

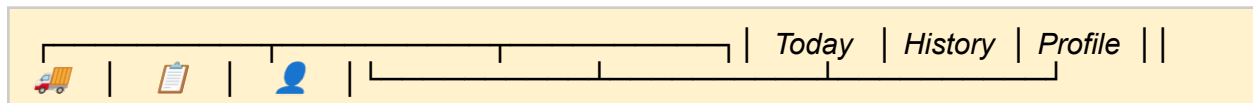

Customer Bottom Tab Bar (5 tabs)

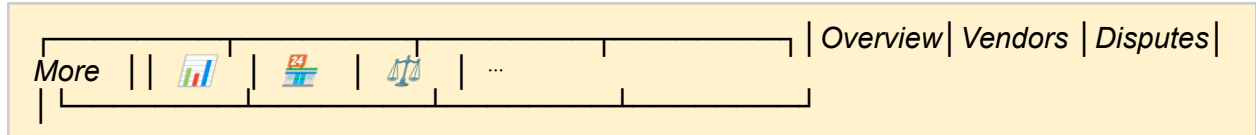

Vendor Bottom Tab Bar (5 tabs)

Driver Bottom Tab Bar (3 tabs)

Admin-Light Bottom Tab Bar (4 tabs)

4. Screen Naming Conventions

Every screen has a unique ID for cross-reference. Format: `S-<ROLE>-<FLOW>-<NUMBER>`

4.1 Role Codes

Code	Meaning
CUST	Customer-role screens
VEND	Vendor-role screens
DRIV	Driver-role screens
ADMN	Admin-role screens (mobile admin-light)
AUTH	Authentication screens (shared across roles)
COMMON	Shared / system-level screens
ERR	Error state screens
EMPTY	Empty state screens

4.2 Flow Codes

Code	Meaning
REG	Registration
LOG	Login
ROL	Role selection / switching
TOT	TOTP / 2FA
HOM	Home / dashboard
VEN	Vendor detail
CAT	Catalog
CRT	Cart
CHK	Checkout
TRK	Tracking
HIS	History
SUB	Subscription
RET	Return
WAL	Wallet

Code	Meaning
PRF	Profile
REV	Review
CMP	Complaint
DSH	Dashboard (vendor/admin)
ORD	Order management
TEA	Team
EAR	Earnings
PAY	Payout
SET	Settings
DEL	Delivery
SHF	Shift
COD	COD reconciliation
DMG	Damage claim
COMPL	Compliance

5. Shared UI Strings

These strings appear across many screens. Keep consistent.

5.1 Generic Error Messages

Context	Copy
Network offline	"No internet connection"
Network timeout	"Couldn't connect. Check your internet and retry."
Server 5xx	"Something went wrong on our end. We're looking into it."
Rate limited	"Too many requests. Try again in a few minutes."
Session expired	"Session expired. Log in again to continue."
Token invalid	"Your session ended. Please log in again."
Permission denied	"You don't have permission for this action."
Invalid input (generic)	"Please check the details and try again."
Upload failed	"Upload failed. Tap to retry."
Action blocked	"This action isn't available right now."
Not found	"We couldn't find what you're looking for."

5.2 Generic Empty States

Context	Title + Body + CTA
No orders	"No orders yet" "Browse vendors to place your first order" "Browse vendors"
No active orders	"No active orders" "All your orders are completed" "View history"
No addresses	"No saved addresses" "Save an address to order faster" "Add address"
No subscriptions	"No subscriptions yet" "Save time with recurring deliveries" "Create subscription"
No deposits	"No active deposits" "You have no containers to return" "(no CTA)"
No reviews (vendor side)	"No reviews yet" "Reviews will appear here once customers rate their orders" "(no CTA)"
No payouts	"No payouts yet" "Your first payout will appear after your first week of orders" "(no CTA)"

Context	Title + Body + CTA
Empty cart	"Your cart is empty" "Add items to get started" "Browse vendors"

5.3 Loading State Strings

Context	Text Shown
Initial app load	Logo + thin progress bar (no text)
Placing order	"Placing your order..."
Finding vendor	"Finding nearest vendor..."
Processing payment	"Processing payment..."
Uploading photo	"Uploading photo..." + progress %
Verifying OTP	"Verifying..."
Saving address	"Saving address..."
Submitting review	"Posting your review..."
Loading list	Skeleton loaders (no text)
Long operation (>5s)	"Still working... hang tight."

5.4 Success Toast Messages

Context	Toast Text
Address saved	"Address saved"
Address updated	"Changes saved"
Address deleted	"Address removed"
Added to cart	"Added to cart"
Review posted	"Review posted"
Subscription created	"Subscription active from <date>"
Subscription paused	"Paused until <date>"
Payment successful	"Payment successful"
Wallet topped up	"₹<amount> added to wallet"
Profile updated	"Profile updated"
Logged out	"Logged out"

Context	Toast Text
Order cancelled	"Order cancelled. Refund initiated."
Complaint filed	"Complaint <ticket #> created"

5.5 Confirmation Dialog Strings

Context	Title + Body + Primary + Secondary
Cancel order	"Cancel this order?" "You may be charged a cancellation fee depending on the vendor's status." "Cancel order" "Keep order"
Delete address	"Delete this address?" "Active orders or subscriptions using this address won't be affected." "Delete" "Keep"
End subscription	"End this subscription?" "You'll no longer receive deliveries. You can create a new one anytime." "End subscription" "Keep"
Logout	"Log out?" "You'll need to enter your phone number to log back in." "Log out" "Cancel"
Delete account	"Delete your Neerly account?" "Your data will be permanently deleted after 30 days. This cannot be undone." "Delete account" "Cancel"
Switch role	"Switch to <role>?" "You'll be taken to the <role> dashboard." "Switch" "Cancel"

6. App Launch & Entry Points

6.1 S-COMMON-SPLASH — Splash / App Launch

Purpose	Initialize app, check auth, route user appropriately
Entry from	App icon tap, deeplink, notification tap, Play Store install
Exit to	Destination varies by auth/role state (see decision tree below)
Duration	Max 2 seconds; extend to 5s max with progress bar

Elements

- Neerly logo centered, large
- Tagline below logo: "Water, sorted."
- Small thin progress bar appears if load > 2s (bottom of screen)
- Background: brand blue gradient

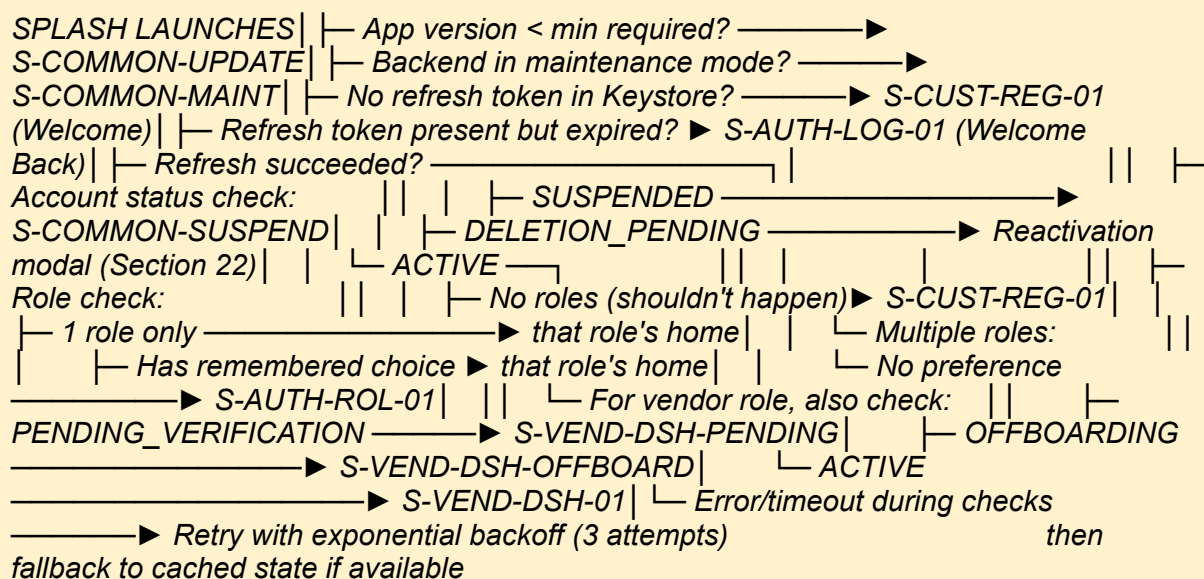

No user interaction

This is an auto-progressing screen. No taps accepted.

API calls

- GET /api/v1/public/app-version — checks min supported version
- GET /api/v1/health — checks backend status
- Silent refresh: POST /api/v1/auth/refresh (if refresh token present)

Destination Decision Tree

Error / edge cases

- Network completely absent: wait 5s, show "No internet — Retry" button at bottom; logo stays
- Backend returns 503: auto-retry 3 times with 2s/4s/8s backoff
- All retries fail: route to S-COMMON-MAINT
- Deeplink present but requires auth user doesn't have: after auth, route to deeplink destination
- Deeplink to screen user can't access (e.g., vendor page for customer-only user): route to login then prompt role add

Accessibility

- Screen reader announces "Neerly, loading"
- Progress bar has role=progressbar with aria-label

6.2 S-COMMON-UPDATE — Force Update Required

Purpose	Require user to update before continuing
Entry from	Splash if app version below minimum
Exit to	Play Store (external)

Elements

- Illustration: phone with download arrow
- Header: "Update required"
- Body: "This version of Neerly is no longer supported. Update to continue using the app."
- Primary CTA: "Update Now" → opens Play Store app page
- Current version shown small at bottom: "Version 1.0.0"

No back button / no skip

- Hardware back button does nothing on this screen

Edge cases

- Play Store unavailable: show secondary text "Alternatively, download from neerly.in"

Copy rationale

- "Update required" not "Please update" — direct without begging
- "Update Now" not "Download" — more specific

6.3 S-COMMON-MAINT — Maintenance Mode

Purpose	Inform user platform is temporarily down
----------------	--

Entry from	Splash when backend signals maintenance
Exit to	Splash (on successful retry)

Elements

- Illustration: tools / wrench
- Header: "We'll be back shortly"
- Body: "Neerly is briefly down for maintenance. We're working to get back as quickly as possible."
- Estimated time (if provided by backend): "Expected back: 3:45 PM"
- Primary CTA: "Retry" (polls /health)
- Secondary link: "View status page" (opens status.neerly.in if available)

Behaviour

- Auto-retry every 30s in background
- Manual retry enabled always
- On success → return to splash, normal flow resumes

Error copy refinements

- If no ETA from backend: "We're working to get back soon." (no specific time)
- If maintenance is planned (scheduled): "Planned maintenance. Back by <time>."

6.4 S-COMMON-OFFLINE — Offline State

Purpose	Inform when device has no network
Entry from	Any screen detecting network loss
Exit to	Resume prior screen on reconnect

Behaviour (not a full screen — banner + state)

- Top banner appears: "No internet — some features unavailable"
- Cached data still viewable (orders, vendors browsed before)
- Write actions (place order, submit review) disabled with greyed-out CTAs
- Tapping disabled CTA shows toast: "Check your internet first"
- On reconnection: banner changes to "Back online" for 2 seconds then disappears

Full offline screen (only shown at app start with no cache)

- Illustration: disconnected wifi icon
- Header: "No internet connection"
- Body: "Check your connection and try again."
- Primary CTA: "Retry"

6.5 S-COMMON-SUSPEND — Account Suspended

Purpose	Inform user their account is suspended
Entry from	Splash or any API call returning ACCOUNT_SUSPENDED
Exit to	Contact support (external) OR role switch (if other active role)

Elements

- Illustration: lock icon
- Header: "Your account is suspended"
- Body (dynamic): "<Reason from backend>"
- If temporary: "Suspension ends on <date>"
- If permanent: "To discuss this, contact support."
- Primary CTA: "Contact support" → WhatsApp deeplink pre-filled with user ID
- Secondary (if user has other role): "Continue as <other role>"

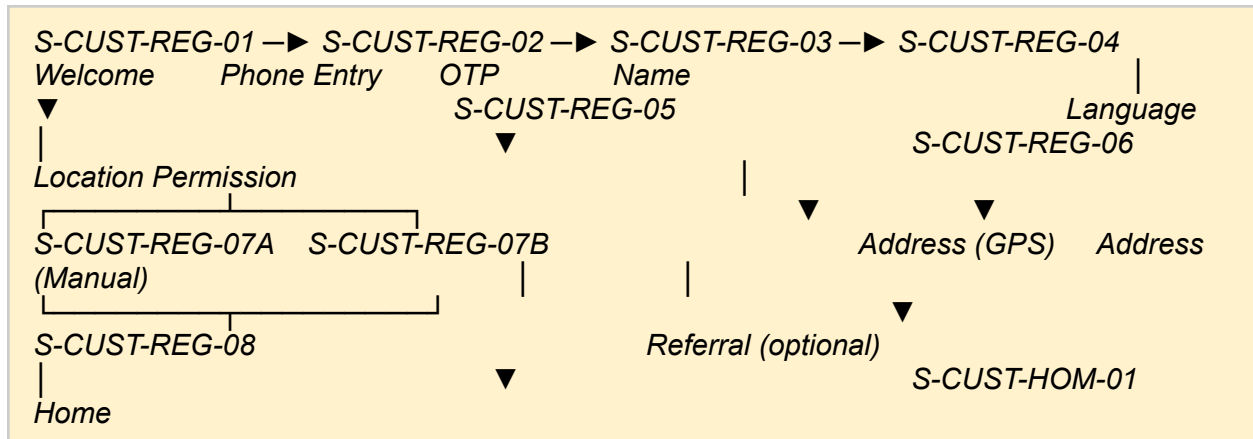

Edge cases

- Multi-role user suspended in one role: other role still works
- All roles suspended: no switch option shown, only support

7. Customer Registration (New User)

Full flow from app install to first home screen.

7.1 Flow Overview

7.2 S-CUST-REG-01 — Welcome

Purpose	Brand intro + route to signup or vendor intent
Entry from	S-COMMON-SPLASH (no session)
Exit to	S-CUST-REG-02 (Get Started) OR S-VEND-REG-01 (I'm a vendor)

Elements

- Neerly logo (large, centered)
- Tagline: "Water, sorted."
- Hero illustration: water can + phone
- Value prop subtitle: "Order clean water from trusted suppliers near you."
- Primary CTA: "Get Started" (blue, full-width, bottom)
- Secondary link below: "I sell water → Register as vendor"
- Language toggle top-right: "EN | ௩" (tappable to switch)
- Fine print at footer: "By continuing you agree to our Terms and Privacy Policy." (with hyperlinks)

Validations

None on this screen.

API calls

None until user taps "Get Started".

Loading states

None — static screen.

Edge cases

- User taps language toggle: whole screen re-renders in new language instantly (no server call for labels)
- User taps vendor link: routes to S-VEND-REG-01 (skip customer signup)
- Back button (hardware): closes app (this is root screen)

Accessibility

- Primary CTA has aria-label "Get started with customer signup"
- Vendor link distinct from CTA, not styled as button
- Logo has alt text "Neerly, water sorted"

7.3 S-CUST-REG-02 — Phone Entry

Purpose	Capture phone number for OTP
Entry from	S-CUST-REG-01 (Get Started)
Exit to	S-CUST-REG-03 (OTP sent)

Elements

- Back arrow top-left
- Header: "Enter your mobile number"
- Subtitle: "We'll send you a one-time password"
- Input row: country code "+91" (locked, non-editable grey) + phone input
- Phone placeholder: "Mobile number"
- Input type: numeric keyboard, 10 digits max, no country code prefix
- Primary CTA: "Send OTP" (disabled until 10 valid digits entered)
- Footer: "Trouble signing in? Contact support" (link)

Validations (on type, real-time)

Condition	Error Copy
Less than 10 digits	No error shown (CTA just disabled)
10 digits but doesn't start with 6/7/8/9	"Enter a valid Indian mobile number"
Non-numeric (shouldn't happen with numeric keyboard)	Auto-strip non-digits silently
Empty field tapped then moved away	No error (CTA disabled is enough)

API calls

- On CTA tap: Firebase SDK `verifyPhoneNumber()` — no backend call

Loading state

- CTA transforms: "Send OTP" → spinner + "Sending..."
- Phone input becomes read-only during send
- Back button disabled during send

Success

- On OTP dispatched: navigate to S-CUST-REG-03

Error states

Error Scenario	User-Facing Copy	User Action
Rate limit: 3 requests in hour	"Too many attempts. Try again after <time remaining>."	Countdown; CTA disabled
Firebase unreachable	"Can't send OTP right now. Try again in a moment."	Retry button
Invalid phone (passed validation but Firebase rejects)	"This number can't receive SMS. Try another number or contact support."	Back to edit
Timeout (10s)	"Still trying to send OTP... Tap retry if it's taking too long." + Retry button	Retry or back

Edge cases

- User enters number with spaces/dashes: auto-strip (98765-43210 → 9876543210)
- User pastes number with +91 prefix: auto-strip the prefix
- User pastes longer number: trim to last 10 digits
- User taps CTA rapidly: button debounces (ignore 2nd tap within 1s)
- Number already registered with DELETED status: proceed to OTP; backend handles as new signup
- Number already registered with ACTIVE status: OTP sent; on exchange, login flow triggers (not signup)

Accessibility

- Phone field has aria-label "Mobile phone number"
- Country code visually distinct from input field
- CTA disabled state announced to screen reader

7.4 S-CUST-REG-03 — OTP Verification

Purpose	Verify user owns the phone number
Entry from	S-CUST-REG-02 (OTP sent)
Exit to	S-CUST-REG-04 (new user) OR S-CUST-HOM-01 (returning) OR S-AUTH-ROL-01 (multi-role)

Elements

- Back arrow top-left
- Header: "Enter OTP"
- Subtitle: "Sent to +91 <masked phone> — Change number" (link for Change)
- OTP input: 4 boxes, auto-advance, numeric keyboard
- Auto-read from SMS (Android SMS Retriever API — no extra permission required)
- Below input: "Didn't receive OTP? Resend" (disabled for 30s with countdown "Resend in 29s")
- Primary CTA: "Verify" (auto-submits on 4 digits entered, or manual submit)

Validations (on complete OTP)

Condition	Behaviour
4 digits entered	Auto-submit
Less than 4 digits + manual submit	Toast: "Enter the 4-digit OTP"
Wrong OTP	Error below boxes: "Wrong OTP — <N> attempts left" — boxes clear
5 wrong attempts	Full-screen lockout message (see error states)

API calls

- Firebase SDK signInWithPhoneAuthCredential(code) — returns Firebase ID Token
- On Firebase success: POST /api/v1/auth/exchange with { firebaseIdToken, role: 'CUSTOMER', deviceId, appVersion }

Loading state

- During verify: boxes greyed, spinner between "Verifying..." text
- Duration: usually < 1.5s

Success paths

Backend Response	Next Screen
isNewUser=true	S-CUST-REG-04 (Name)
isNewUser=false, single role	S-CUST-HOM-01 or respective role home
isNewUser=false, multiple roles	S-AUTH-ROL-01

Backend Response	Next Screen
isNewUser=false, status=DELETION_PENDING	Reactivation modal (Section 22)
isNewUser=false, status=SUSPENDED	S-COMMON-SUSPEND

Error states

Error	Copy	Behaviour
Wrong OTP	"Wrong OTP — <n> attempts left"	Clear boxes, refocus first box
5 wrong attempts	Full message: "Too many wrong attempts. Try again in 15 minutes."	OTP screen disabled for 15 min countdown
OTP expired (5 min)	"OTP expired. Request a new one."	Resend becomes primary CTA
Network error during verify	"Couldn't verify — check your connection and retry."	Retry button
Firebase verification failure	"Something went wrong. Try again or request a new OTP."	Retry OR resend
Exchange endpoint fails after Firebase success	"Almost there... retrying..." (auto-retry up to 3x)	If all fail: "Can't reach our servers. Check internet." + Retry

Edge cases

- User closes app during OTP wait: returns to this screen with OTP input empty; can request new OTP
- User receives OTP after SMS Retriever timed out: auto-read fails, user enters manually — still works
- User on dual-SIM device: OTP goes to number registered; if not received in 30s, Resend
- User taps Resend: same OTP flow; timer resets to 30s
- User taps Change number: returns to S-CUST-REG-02 with field pre-filled
- User enters phone belonging to a deleted account: exchange endpoint returns status=DELETED → allow fresh registration

Accessibility

- OTP boxes have aria-label "OTP digit <n>"
- Error messages have role=alert so screen reader announces them
- Auto-advance announced as "Moving to next digit"

7.5 S-CUST-REG-04 — Name Entry

Purpose	Capture user's display name
Entry from	S-CUST-REG-03 (new user)
Exit to	S-CUST-REG-05 (Language)

Elements

- Back arrow top-left (with warning if pressed: "Go back? You'll lose progress.")
- Header: "What should we call you?"
- Subtitle: "This helps drivers recognize you at delivery."
- First name input (required): placeholder "First name"
- Last name input (optional): placeholder "Last name (optional)"
- Primary CTA: "Continue" (disabled until first name valid)

Validations

Condition	Error Copy
First name empty	(no error; CTA just disabled)
First name < 2 chars	"Name is too short"
First name > 50 chars	Truncate at 50; (no error)
Only numbers or symbols	"Name can only contain letters"
Mostly symbols/numbers (e.g., '...')	"Enter a valid name"

API calls

- On CTA tap: PATCH /api/v1/customer/profile with { displayName: firstName + (lastName ? ' ' + lastName : '') }

Edge cases

- User enters single-word name (common): accepted
- User enters Telugu/Hindi script: accepted (Unicode validation, 2+ chars)
- User pastes name with excess whitespace: auto-trim
- User goes back: name draft cached locally; pre-filled on return

7.6 S-CUST-REG-05 — Language Selection

Purpose	Set preferred language
Entry from	S-CUST-REG-04

Exit to	S-CUST-REG-06
---------	---------------

Elements

- Back arrow top-left
- Header: "Choose your language"
- Subtitle: "You can change this later in settings."
- Radio list (large touch targets):
 - "English"
 - "తెలుగు (Telugu)"
 - "हिंदी (Hindi)" — greyed with label "(Coming soon)" in V1.0
- Auto-selection: device locale if Telugu or English; else English
- Primary CTA: "Continue"

Behaviour

- Selecting a language re-renders the screen in that language immediately (test it feels right)
- Hindi row is visible but non-tappable with greyed styling

API calls

- On CTA tap: PATCH /api/v1/customer/profile with { preferredLanguage: 'en'|'te' }

Edge cases

- User taps Hindi (greyed): no response; small toast "Hindi coming soon"
- User goes back after language change: name screen now in new language

7.7 S-CUST-REG-06 — Location Permission

Purpose	Ask for location to find nearby vendors
Entry from	S-CUST-REG-05
Exit to	S-CUST-REG-07A (allowed) OR S-CUST-REG-07B (denied)

Elements

- Illustration: map pin with water drop
- Header: "Allow location access"
- Subtitle: "So we can find water suppliers near you."
- Bullet benefits list:
 - "See vendors in your area"
 - "Get accurate delivery times"
 - "We never track you when the app is closed"
- Primary CTA: "Allow location" — triggers Android system dialog

- Secondary: "I'll enter my address manually" (link, muted color)

Behaviour

- Tap primary → Android system permission prompt appears
- User grants: proceed to S-CUST-REG-07A
- User denies: proceed to S-CUST-REG-07B
- User taps secondary: skip permission, proceed to S-CUST-REG-07B

Edge cases

- Permission already granted (app re-launched mid-signup): skip this screen, go directly to 07A
- Permission denied previously + "Don't ask again" checked: show 07B directly; link "Enable location in settings" if user wants

7.8 S-CUST-REG-07A — First Address (With GPS)

Purpose	Capture first delivery address using GPS
Entry from	S-CUST-REG-06 (allowed)
Exit to	S-CUST-REG-08

Elements

- Back arrow top-left
- Header: "Where should we deliver?"
- Interactive map widget (upper half of screen):
 - Draggable pin at current location
 - Blue dot showing user's exact position
 - Hint overlay: "Drag pin to exact location"
- Reverse-geocoded address appears below map (auto-filled, editable):
 - Flat/House Number (required): "e.g., 204"
 - Building Name (required): "e.g., Lakshmi Residency"
 - Street (required): "e.g., 12th Road"
 - Landmark (optional): "e.g., Near Bank of India"
 - Area: auto-filled (read-only, derived from pin)
 - Pincode: auto-filled (editable if wrong)
- Additional (optional, collapsible section): "Add details for better delivery"
 - Floor number: "e.g., 2nd floor"
 - Has lift? toggle
 - Delivery instructions (100 char): "e.g., Call guard at main gate"
- Address label (radio): "Home" (default) | "Work" | "Other"
- If Other selected: custom label field appears, placeholder "Label (e.g., Mom's house)"
- Primary CTA: "Save Address"

Validations

Field	Rule	Error
Flat/House Number	1-50 chars, required	"Flat or house number required"
Building Name	2-200 chars, required	"Building name required"
Street	2-200 chars, required	"Street required"
Landmark	Max 200 chars, optional	(no error)
Pincode	6 digits, 1st digit 1-9	"Enter a valid 6-digit pincode"
Custom label	2-30 chars if selected Other	"Enter a label"

Service area check on save

- Backend validates pincode against serviceable_areas
- If serviceable: address saved, proceed to S-CUST-REG-08
- If NOT serviceable: modal appears (see below), still saves address

Service-area-not-served Modal

- Title: "We don't serve this area yet"
- Body: "<Pincode> isn't on our map. We'll notify you when we launch there."
- Subscribe field: user's phone already shown, checkbox "Notify me when Neerly comes here" (pre-checked)
- Primary CTA: "Continue" (proceeds with address saved but flagged)
- Secondary: "Enter different address"

API calls

- Reverse geocoding: GET /api/v1/customer/geocode?lat=X&lng=Y
- Pincode validation: GET /api/v1/customer/pincode/<pincode>/serviceable
- Save: POST /api/v1/customer/addresses with full payload

Loading states

- Map load: skeleton grey tile until Google Maps ready (2-4s typical)
- Reverse geocode on pin drag: subtle shimmer on address fields while updating
- Save CTA: spinner "Saving..."

Error states

Error	Copy
Map failed to load	"Map unavailable. Enter address manually." (switches to 07B)
Reverse geocode failed	"Couldn't detect address. Please enter manually." (fields editable, not auto-filled)
Save failed (network)	"Couldn't save address. Retry."
Save failed (validation from server)	"Please check address details." + field-level errors

Edge cases

- User drags pin outside 1km of initial location: show info "This is far from your current location. Are you sure?" (not blocking)
- GPS accuracy low (> 100m): warning "Your location may be inaccurate — check the pin"
- User taps map to move pin (vs drag): also works, pin animates to tapped position
- Landmark field overflows: allow up to 200 chars, show character count at 150

Accessibility

- Map has role=application with aria-label "Map for choosing address"
- Pin position announced: "Pin at <area name>"
- Fields have clear labels for screen reader

7.9 S-CUST-REG-07B — First Address (Manual)

Purpose	Capture address without GPS
Entry from	S-CUST-REG-06 (denied) OR from 07A error
Exit to	S-CUST-REG-08

Elements

- Same fields as 07A but no map
- Pincode field at top (so we can validate serviceability early):
 - "Pincode" (required): large input, numeric keyboard
 - As user types, autocomplete shows matching areas (from city database)
- Rest of fields: Flat, Building, Street, Landmark, Floor, Lift, Instructions, Label
- Small map preview below fields (after address geocoded on save): "Is this location correct?"
- Primary CTA: "Save Address"

Flow difference

- On save: backend geocodes address text → returns lat/lng
- If geocoding ambiguous: show map preview with pin, ask user to confirm or adjust
- If geocoding fails: accept address as-is with warning "We couldn't pin your exact location. Delivery may be slightly delayed."

7.10 S-CUST-REG-08 — Referral Code (Optional)

Purpose	Allow referral code entry for reward
Entry from	S-CUST-REG-07A/B
Exit to	S-CUST-HOM-01
Skip condition	Hidden if referral code pre-filled via deeplink

Elements

- Illustration: gift icon or people connecting
- Header: "Got a referral code?"
- Subtitle: "Get ₹75 off your first order when a friend refers you."
- Input field: placeholder "Enter code (e.g., SHIVA2026)"

- Auto-uppercase on input
- Primary CTA: "Apply & Continue"
- Secondary: "Skip — I don't have a code" (text link, not button)

Validations

Condition	Copy
Empty + primary tap	Small inline: "Enter a code or tap Skip"
Invalid format (< 4 or > 20 chars)	"Enter a valid code"
Valid format entered	On CTA: call backend to validate

API calls

- POST /api/v1/customer/referral/claim with { code }

Success

- Backend validates + creates ReferralClaim + credits unlocked (later, on first order)
- Small celebration toast: "Referral applied! You'll get ₹75 on first order."
- Navigate to S-CUST-HOM-01

Error states

Error	Copy
Code not found	"This code doesn't exist. Check and retry, or tap Skip."
Code expired	"This code has expired. Tap Skip to continue."
Code already used by you	"You've already used a referral code."
Network error	"Couldn't verify code. Retry or Skip."

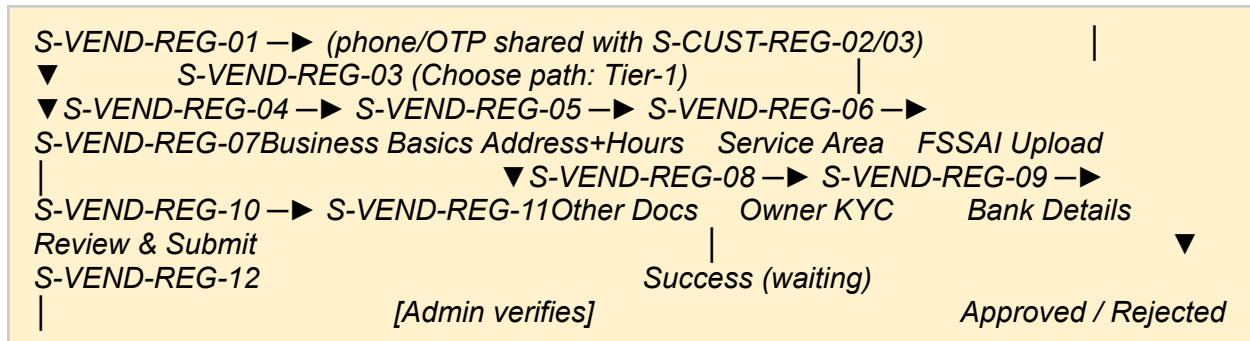

Edge cases

- User arrives via deeplink with code: screen skipped, code auto-applied, toast shows
- Invalid code from deeplink: show screen with code pre-filled + error pre-shown
- User taps Skip: no API call, direct to home
- User taps Apply with whitespace only: same as empty

8. Vendor Registration — Tier-1

For vendors who already have FSSAI license. Fastest route to going live.

8.1 Flow Overview

8.2 S-VEND-REG-01 — Vendor Welcome

Purpose	Brand intro for vendors + kick off onboarding
Entry from	Link on S-CUST-REG-01 OR direct deeplink
Exit to	S-VEND-REG-02 (phone entry shared screen) on continue

Elements

- Header: "Sell water to customers in your area"
- Hero illustration: shop + phone + water delivery
- Value prop cards (3 cards, scrollable):
 - Card 1: "Steady orders" — "Get consistent on-demand and subscription orders from verified customers."
 - Card 2: "Weekly payouts" — "Get paid every Monday. No chasing payments."
 - Card 3: "Low commission" — "10% standard — as low as 6% at volume."
- Expected setup info: "Verification takes 24-48 hours if documents are ready."
- Primary CTA: "Start Onboarding"
- Secondary (link): "Don't have FSSAI? Start with Tier-2 (3-4 weeks)"
- Tertiary (small): "Already have an account? Log in"

Edge cases

- User already has vendor account (returning): detect after phone OTP → route to login instead
- User is existing customer: after OTP, shows "You already have a customer account. Add vendor role?" modal

8.3 S-VEND-REG-02 — Phone + OTP

Identical to S-CUST-REG-02/03 flow. Shared component. See Section 7.3 and 7.4 for full detail.

- One difference: role hint sent to backend as `VENDOR_OWNER`
- On success, routes to S-VEND-REG-03 (path picker)

8.4 S-VEND-REG-03 — Choose Onboarding Path

Purpose	Route vendor to Tier-1 or Tier-2 flow
Entry from	S-VEND-REG-02 (OTP success)
Exit to	S-VEND-REG-04 (Tier-1) OR S-VEND-T2-01 (Tier-2)

Elements

- Header: "Do you have an FSSAI license?"
- Subtitle: "Your path depends on your documentation status."
- Option cards (tappable):
 - Option 1: "Yes, all documents ready" — "Go live in 24-48 hours"
 - Option 2: "I have FSSAI but some docs pending" — "Upload what you have; complete later"
 - Option 3: "No, I need help with FSSAI" — "Our partner will file it (3-4 weeks)"
- Helpful link: "What's FSSAI? → Learn more" (opens info sheet)

Options 1 and 2 route to Tier-1 (this section). Option 3 routes to Tier-2 (Section 9).

Info sheet content

- Title: "About FSSAI"
- Body: "FSSAI (Food Safety and Standards Authority of India) license is legally required to sell packaged water. There are two types: Registration (turnover < ₹12 lakh) and State License (₹12L-₹20Cr)."
- CTA: "OK, got it"

8.5 S-VEND-REG-04 — Business Basics

Purpose	Capture basic business entity details
Entry from	S-VEND-REG-03 (path chosen)
Exit to	S-VEND-REG-05

Elements

- Progress indicator at top: "Step 1 of 8" + visual bar
- Back arrow with warning modal on press: "Go back? You'll lose progress."

- Header: "Tell us about your business"
- Fields:
 - — Business name (required): placeholder "As shown on FSSAI license"
 - — Proprietor name (required): placeholder "Your full name"
 - — Business type (dropdown): "Proprietor" (default) / "Partnership" / "Private Limited" / "LLP"
 - — Category (multi-select checkboxes, at least 1 required):
 - "Water Supplier (cans, bottles)"
 - "Tanker Operator (bulk water)"
 - — Years in business (number, 0-100): placeholder "e.g., 3"
 - — Primary phone for business (required, can differ from login phone)
- Primary CTA: "Continue"

Validations

Field	Rule	Error
Business name	2-200 chars	"Business name required"
Proprietor name	2-100 chars, letters+spaces	"Enter a valid name"
Category	At least 1 selected	"Select at least one category"
Years in business	Integer 0-100	"Enter years (0-100)"
Business phone	Valid +91 mobile format	"Enter a valid mobile number"

API calls

- On Continue: PATCH /api/v1/vendor/me with business basics payload
- Creates vendor record if not yet existing; updates if exists

8.6 S-VEND-REG-05 — Business Address & Hours

Purpose	Capture shop location + operating hours
Entry from	S-VEND-REG-04
Exit to	S-VEND-REG-06

Elements

- Progress: "Step 2 of 8"
- Header: "Where is your shop?"
- Map widget (same as customer address screen)
- Shop address fields:

- Shop/Flat number, Building, Street, Landmark, Pincode (same format as customer)
- Divider
- Sub-header: "Your working hours"
- Day-by-day hour configurator:
 - Each day has: toggle (open/closed), open time picker, close time picker
 - "Copy to all days" button (sets every day to Mon-Fri hours)
 - Default: Mon-Sat 6:00 AM to 9:00 PM, Sun closed
- Lunch break toggle: "Have a lunch break?"
 - If toggled on: time pickers for lunch start/end
- Primary CTA: "Continue"

Validations

- At least 1 day must be open
- Close time must be after open time
- Lunch break must be within working hours

8.7 S-VEND-REG-06 — Service Area

Purpose	Define which areas the vendor delivers to
Entry from	S-VEND-REG-05
Exit to	S-VEND-REG-07

Elements

- Progress: "Step 3 of 8"
- Header: "Where do you deliver?"
- Subtitle: "You can change this anytime."
- Tab selector: "By Pincode" | "By Radius" | "Custom Area (coming soon)"
- By Pincode tab (default):
 - Autocomplete pincode input
 - Chips appear for added pincodes, with X to remove
 - Hint: "Add all pincodes you deliver to"
 - Hyderabad pincodes shown as suggestions based on business pincode
- By Radius tab:
 - Map with circle around business location
 - Slider: 1-15 km (default 5 km)
 - Preview list below map: "Covers X pincodes: <list>"
- Primary CTA: "Continue"

Validations

- At least 1 pincode (or non-zero radius) required

- Max 30 pincodes (to prevent overload)

8.8 S-VEND-REG-07 — FSSAI Upload

Purpose	Upload FSSAI license
Entry from	S-VEND-REG-06
Exit to	S-VEND-REG-08

Elements

- Progress: "Step 4 of 8"
- Header: "Upload your FSSAI license"
- Subtitle: "Registration Certificate or State License — both accepted."
- FSSAI number input (required): 14-digit, format-masked, numeric keyboard
- License type radio (required):
 - "FSSAI Registration (turnover < ₹12 lakh/year)"
 - "FSSAI State License (₹12L - ₹20Cr/year)"
 - "FSSAI Central License (above ₹20Cr/year)"
- Expiry date picker (required)
- Upload widget: "Upload license photo"
 - — Camera icon + Gallery icon options
 - — After upload: thumbnail preview with "Retake" option
 - — Max 5 MB, PDF or JPG/PNG
- Quality hint: "Make sure the license number and expiry are clearly visible."
- Primary CTA: "Continue"

Validations

Field	Rule	Error
FSSAI number	14 digits, all numeric	"FSSAI number must be 14 digits"
License type	One selected	"Choose license type"
Expiry date	In future	"This license has expired. Please renew before onboarding."
Photo	Uploaded successfully	"Upload the license photo"
Photo quality	Sharp enough (basic client-side check)	"Photo is blurry — retake"

Edge cases

- License expires within 30 days: warning "This license expires soon — you may need to renew during verification." (not blocking)
- User pastes photo from gallery: check dimensions (min 800px)
- PDF upload: show first page as thumbnail
- Upload > 5MB: "Photo too large. Use a smaller image."

8.9 S-VEND-REG-08 — Other Compliance Documents

Purpose	Upload additional mandatory/optional compliance docs
Entry from	S-VEND-REG-07
Exit to	S-VEND-REG-09

Elements

- Progress: "Step 5 of 8"
- Header: "Other documents"
- Subtitle: "Mandatory documents marked with *"
- Collapsible sections per document:
 1. Shop Establishment Certificate * — number + expiry + photo upload
 2. PAN * — number (format-masked AAAAA9999A) + photo upload
 3. GSTIN (required only if turnover > ₹20L) — number + photo upload
 4. Trade License (if required by state) — optional
 5. Groundwater Permit (if applicable) — optional
- Each section header shows:
 - Green check if complete
 - Red * if mandatory and incomplete
- GSTIN turnover question: "Is your annual turnover above ₹20 lakh?" (Yes makes GSTIN mandatory)
- Primary CTA: "Continue" (enabled when all mandatory complete)

Validations (per field)

- Shop Establishment number: free text 4-50 chars
- PAN: format check (5 letters + 4 digits + 1 letter), error "Enter a valid PAN"
- GSTIN: 15-char format with state code, checksum, error "Enter a valid GSTIN"
- Photos: same size/quality checks as FSSAI

8.10 S-VEND-REG-09 — Owner KYC

Purpose	Verify proprietor's identity
Entry from	S-VEND-REG-08

Exit to	S-VEND-REG-10
---------	---------------

Elements

- Progress: "Step 6 of 8"
- Header: "Verify your identity"
- Subtitle: "Required by regulations. Data is encrypted."
- ID type dropdown (required):
 - "Aadhaar" (default)
 - "Voter ID"
 - "Passport"
 - "Driving License"
- ID number (format-masked per type):
 - Aadhaar: 12 digits, display masked after entry (XXXX XXXX 1234)
 - Voter ID: format varies, 10-20 alphanumeric
 - Passport: 1 letter + 7 digits
 - Driving License: 16 chars alphanumeric
- Front photo upload (required for all)
- Back photo upload (required for Aadhaar and Voter ID)
- Selfie capture (required, live camera only, NO gallery upload):
 - — Large button: "Take selfie"
 - — Opens camera directly
 - — Overlay oval guide
- Liveness check: blink prompt (V1.1)
- Privacy reassurance: "We only share with regulated partners for verification."
- Primary CTA: "Continue"

Validations

- Aadhaar: must pass Verhoeff checksum
- PAN-style format for each ID type
- Front photo mandatory, back photo for applicable types
- Selfie must be recent (cannot be uploaded from gallery)

8.11 S-VEND-REG-10 — Bank Details

Purpose	Capture payout destination
Entry from	S-VEND-REG-09
Exit to	S-VEND-REG-11

Elements

- Progress: "Step 7 of 8"

- Header: "Where should we send payouts?"
- Subtitle: "Payouts are weekly on Mondays via NEFT/IMPS."
- Fields:
 - Account holder name (required, must match PAN or business name)
 - Bank account number (required, numeric)
 - Confirm account number (required, must match first — prevents typos)
 - IFSC code (required): 11 chars, auto-fetches bank + branch name on valid IFSC
 - Bank/branch preview (auto-populated): e.g., "HDFC Bank, Jubilee Hills Branch"
 - Account type radio: "Savings" / "Current"
 - Cancelled cheque photo upload (required): placeholder shows sample
- Security notice: "Bank details are encrypted. We never share them outside payment partners."
- Primary CTA: "Continue"

Validations

- Account number: 9-18 digits (varies by bank)
- Confirm account number: exact match required
- IFSC: 11 chars, format "AAAA0XXXXXX" (4 letters + 0 + 6 alphanumeric)
- Invalid IFSC: "Enter a valid IFSC code"
- Account number mismatch: "Account numbers don't match"
- Cheque photo required: "Upload a cancelled cheque"

8.12 S-VEND-REG-11 — Review & Submit

Purpose	Final review before submission
Entry from	S-VEND-REG-10
Exit to	S-VEND-REG-12 (success)

Elements

- Progress: "Step 8 of 8"
- Header: "Review your details"
- Scrollable summary (each section has Edit link):
 - Business info
 - Address & hours
 - Service area
 - FSSAI (shows license number and expiry)
 - Other documents (checklist of what's uploaded)
 - Owner KYC (ID type + last 4 digits)
 - Bank details (bank + last 4 digits)

- Commission info box: "Your commission rate: 10% standard. Reduces to 8% above 500 orders/month, 6% above 1,500."
- Terms acceptance checkboxes (both required):
 - "I have read and agree to the Neerly Vendor Terms" (with hyperlink)
 - "All information provided is accurate and true"
- Primary CTA: "Submit for Verification" (disabled until both checked)

Edit flow

- Tapping Edit in any section returns to that step with data pre-filled
- On save, returns to review screen

8.13 S-VEND-REG-12 — Submission Success

Purpose	Confirm submission and set expectations
Entry from	S-VEND-REG-11 (submit tap)
Exit to	Splash (on close); later, vendor dashboard post-approval

Elements

- Illustration: checkmark on document
- Header: "Application submitted"
- Body: "Our team will verify your details within 24-48 hours. We'll SMS and notify you once approved."
- Reference number card: "Application ID: VND-2026-XXXXX" (for support reference)
- What happens next list:
 1. "Our team reviews your documents"
 2. "We cross-check your FSSAI against FoSCoS"
 3. "You'll get a notification once approved"
 4. "Log in and add products to go live"
- Primary CTA: "Close" (exits to splash; next login routes to dashboard)
- Secondary link: "Track application status" (→ limited dashboard showing pending state)

Post-approval experience

- SMS: "Welcome to Neerly! Your application is approved. Log in to add products."
- Push: Same message
- Next login → role picker shows Vendor → vendor dashboard with onboarding checklist

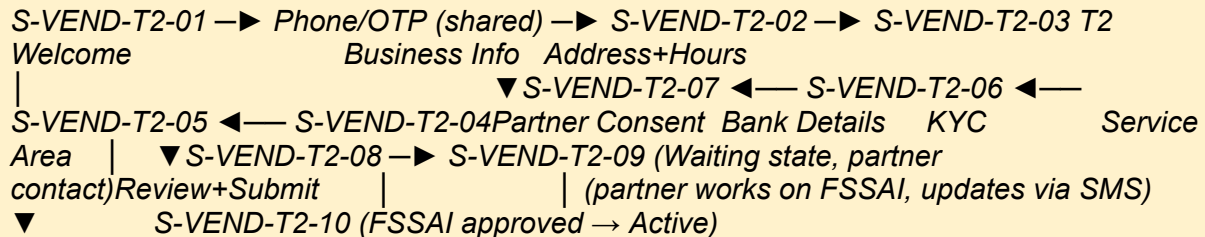

Post-rejection experience

- SMS + push: "Your application needs attention. <Reason from admin>"
- Login → shows rejection reason + "Fix issues and resubmit" CTA
- Opens edit flow starting from the flagged section

9. Vendor Registration — Tier-2

For vendors without FSSAI. Compliance partner (CA firm) files it on their behalf.

9.1 Flow Overview

9.2 S-VEND-T2-01 — Tier-2 Welcome

Entry from	S-VEND-REG-03 (chose 'Need help with FSSAI')
Exit to	S-VEND-T2-02 on continue OR S-VEND-REG-01 to reconsider

Elements

- Illustration: handshake / partnership visual
- Header: "Start selling water in 3-4 weeks"
- Subtitle: "Our compliance partner will help you get FSSAI license."
- Transparency cards:
 - Card 1: "Partner fee" — "Approximately ₹2,500, paid directly to partner"
 - Card 2: "Commission" — "12% for first 3 months, then 10%"
 - Card 3: "Timeline" — "FSSAI filing takes 3-4 weeks; we'll keep you updated"
- Note: "You can start accepting orders only after FSSAI is approved."
- Primary CTA: "Start Application"
- Secondary link: "I'll get FSSAI myself" → back to S-VEND-REG-01

Copy rationale

- We're transparent about the partner fee because hiding it causes distrust
- We're explicit about timeline to set realistic expectations
- Reassurance that they're not alone (partner handles it)

9.3 S-VEND-T2-02 through S-VEND-T2-04

Identical to Tier-1's corresponding screens. Reuse. See Sections 8.5, 8.6, 8.7 respectively.

- S-VEND-T2-02 = Business Basics (same as S-VEND-REG-04)

- S-VEND-T2-03 = Address & Hours (same as S-VEND-REG-05)
- S-VEND-T2-04 = Service Area (same as S-VEND-REG-06)

9.4 S-VEND-T2-05 — KYC (Simpler)

Purpose	Basic identity verification
Entry from	S-VEND-T2-04
Exit to	S-VEND-T2-06

Elements

- Header: "Verify your identity"
- Subtitle: "Partner will use these to file FSSAI for you."
- PAN (required): number + photo
- Aadhaar (required): number + photo (front) + photo (back)
- Selfie (required): live camera
- Primary CTA: "Continue"

9.5 S-VEND-T2-06 — Existing Documents

Purpose	Collect any docs vendor already has
Entry from	S-VEND-T2-05
Exit to	S-VEND-T2-07

Elements

- Header: "What documents do you have?"
- Subtitle: "Upload what's ready. Partner will help with the rest."
- Checklist (each is optional):
 - Shop Establishment Certificate (upload if available)
 - Trade License (upload if available)
 - Groundwater permit (upload if available)
 - GSTIN (if already registered)
 - Bank account ready (toggle)
- Primary CTA: "Continue"

Edge cases

- If "Nothing yet": that's fine — partner will help with all of them

9.6 S-VEND-T2-07 — Partner Consent

Purpose	Get explicit consent for data sharing with partner
Entry from	S-VEND-T2-06
Exit to	S-VEND-T2-08

Elements

- Header: "Your compliance partner"
- Partner card:
 - — Partner name: "<Partner Firm Name>"
 - — Credentials: "CA firm, 15+ years experience, registered with Neerly"
 - — Contact: WhatsApp + phone (tap to call/chat)
- What partner will do (bullet list):
 - • "Collect any remaining documents from you"
 - • "File FSSAI application on your behalf"
 - • "Handle follow-ups with the authority"
 - • "Notify you at each stage"
- Fee box: "Partner fee: ₹2,500 (one-time, paid directly to partner, not via Neerly)"
- Consent checkboxes (both required):
 - "I authorise the partner to file FSSAI on my behalf"
 - "I agree to share my documents with the partner for this purpose"
- Privacy note: "Partner agrees to not use your data beyond FSSAI filing."
- Primary CTA: "I Agree, Continue"
- Secondary: "I'll think about it" → back to S-VEND-REG-01

9.7 S-VEND-T2-08 — Review & Submit

Same structure as Tier-1's S-VEND-REG-11, but with partner consent shown and no FSSAI details.

- Confirmation box: "Partner will contact you within 2 business days"
- Primary CTA: "Submit Application"

9.8 S-VEND-T2-09 — Waiting State (Partner in progress)

Purpose	Show progress while partner works on FSSAI
Entry from	S-VEND-T2-08 (submitted)
Exit to	S-VEND-DSH-01 (once FSSAI approved)

Elements

- Illustration: clock / in-progress indicator
- Header: "Application received"

- Status stepper (vertical):
 - ✓ "Application submitted" (done, with timestamp)
 - ○ "Partner will contact you" (in progress, pulsing)
 - ○ "Documents collected"
 - ○ "FSSAI filed with authority"
 - ○ "FSSAI approved — You're live!"
- Current step highlighted in blue
- Partner contact card: WhatsApp + phone
- Expected timeline reminder: "3-4 weeks for FSSAI approval"
- Primary CTA: "Got it" (exits app / minimal navigation)
- Secondary: "Update documents" (if partner asked for more)

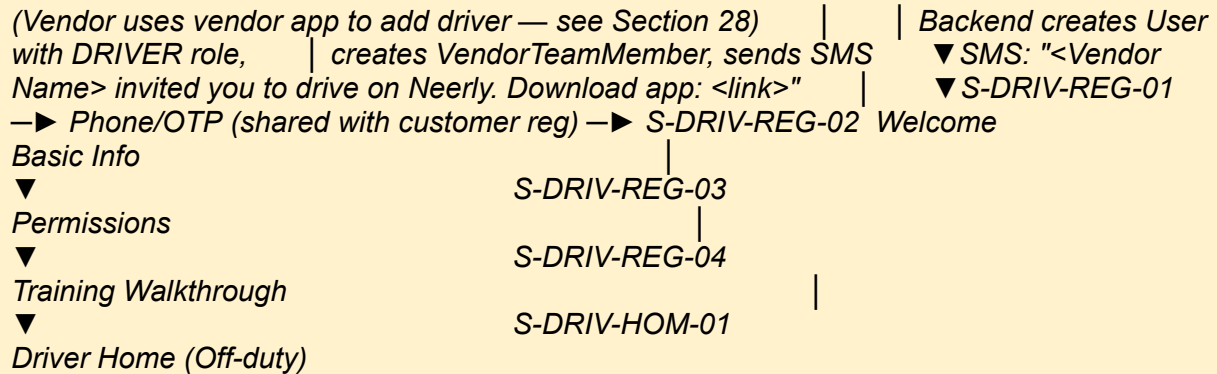

Notifications received during this phase

- "Partner <Name> will call you today" (when partner engaged)
- "Partner needs <doc> — tap to upload" (doc collection)
- "FSSAI application filed on <date>" (filed with authority)
- "FSSAI approved! You're live on Neerly" (final success)

10. Driver Registration & Onboarding

Drivers don't self-register. Vendor adds them; they get an SMS and complete onboarding.

10.1 Flow Overview

10.2 S-DRIV-REG-01 — Driver Welcome

Purpose	Brand intro for drivers
Entry from	Deeplink from vendor's SMS OR direct app install + phone match

Elements

- Illustration: delivery scooter with water
- Header: "Welcome to Neerly"
- Subtitle (personalised if deeplink): "<Vendor Name> invited you to drive."
- Subtitle (generic if no deeplink): "You've been invited to drive."
- Value props (cards):
 - "Flexible schedule — Work on your shift"
 - "Clear assignments — See deliveries, routes, and OTPs"
 - "Vendor support — Your vendor is always a tap away"
- Primary CTA: "Continue"

10.3 S-DRIV-REG-02 — Basic Info

Purpose	Confirm driver details (most pre-filled)
Entry from	Phone/OTP success
Exit to	S-DRIV-REG-03

Elements

- Header: "Confirm your details"
- Subtitle: "<Vendor Name> added these. You can edit if needed."
- Pre-filled fields (editable):
 - — Name (from vendor's invite)
 - — Vehicle type (editable dropdown)
 - — Vehicle registration number
- Additional fields (driver fills):
 - — Emergency contact name (required)
 - — Emergency contact phone (required)
 - — Preferred language (same as customer)
- Primary CTA: "Continue"

10.4 S-DRIV-REG-03 — Permissions

Purpose	Request required Android permissions
Entry from	S-DRIV-REG-02
Exit to	S-DRIV-REG-04

Elements

- Header: "We need a few permissions"
- Subtitle: "These help you work smoothly."
- Permission cards (each with icon, title, explanation, "Allow" button):
 1. Location (Always)
 - "So customers can track your delivery in real-time"
 - Note: "We only track during active deliveries, not off-shift."
 2. Camera
 - "For delivery and pickup photos (required at every delivery)"
 3. Notifications
 - "To receive new delivery assignments"
- After each Allow tap: triggers Android system dialog
- Progress indicator: "2 of 3 granted"
- Skip option: "Skip for now" (only enabled if all permissions already handled)
- If skipped: warning screen "You won't be able to receive or complete deliveries without these. Continue?"

10.5 S-DRIV-REG-04 — Training Walkthrough

Purpose	Show driver how to use app
----------------	----------------------------

Entry from	S-DRIV-REG-03
Exit to	S-DRIV-HOM-01

Elements

- 4-slide carousel with progress dots
- Slide 1: "Receive delivery assignments" — screenshot of new order alert
- Slide 2: "Navigate to customer" — screenshot of map view
- Slide 3: "Complete with OTP + photo (always required)" — screenshot of photo capture
- Slide 4: "Collect cash for COD orders" — screenshot of COD summary
- Per-slide:
 - — Image/screenshot (large)
 - — Title (short)
 - — 1-2 line explanation
- Navigation: swipe or next arrow
- Skip link top-right: "Skip"
- Final slide CTA: "Got it, let's go"

11. Login (All Roles — Returning Users)

Universal returning-user login flow. Phone-OTP based for all roles.

11.1 S-AUTH-LOG-01 — Welcome Back

Purpose	Route returning user to login
Entry from	S-COMMON-SPLASH (expired/missing session) OR manual logout
Exit to	S-AUTH-LOG-02 (OTP screen, shared with registration)

Elements

- Subtle Neerly branding (smaller logo than registration welcome)
- Header: "Welcome back"
- Subtitle: "Enter your mobile number to log in."
- Phone input with auto-fill (Android autofill framework + last-login cache):
 - Pre-filled if last-login number cached
 - Editable
- Primary CTA: "Send OTP"
- Secondary link: "Use different number" (clears pre-fill)
- Footer: "New to Neerly? Sign up" + "Need help? Contact support"

Silent authentication

- This screen is only shown when silent auth fails
- Silent auth attempt happens on splash screen; typical users skip this screen 90% of the time

Edge cases

- Phone is registered but account status != ACTIVE: proceed to OTP, show appropriate screen post-verify (suspend, deletion-pending)
- Phone not registered: proceed to OTP (Firebase will send OTP to any valid number); on exchange, backend returns 'not found' → show modal "No Neerly account for this number. Sign up?" with button to start registration

11.2 S-AUTH-LOG-02 — OTP (Shared with Registration)

Identical to S-CUST-REG-03. See Section 7.4.

Post-verify routing decisions:

Backend Response Status	Next Screen
ACTIVE, single role	Direct to that role's home

Backend Response Status	Next Screen
ACTIVE, multiple roles, no preference	S-AUTH-ROL-01 (role picker)
ACTIVE, multiple roles, preference saved	Direct to preferred role's home
SUSPENDED (any role)	S-COMMON-SUSPEND
DELETION_PENDING	Reactivation modal
DELETED	Modal: "This account is deleted. Sign up as new user?"
Vendor role with PENDING_VERIFICATION	S-VEND-DSH-PENDING (not normal dashboard)
Vendor role with OFFBOARDING	S-VEND-DSH-OFFBOARD (wind-down)

11.3 Reactivation Modal (Deletion Pending User)

- Title: "Welcome back!"
- Body: "Your account is scheduled for deletion on <date>. Log in to cancel the deletion and keep your account."
- Primary CTA: "Keep my account" (reactivates, then routes to home)
- Secondary CTA: "Continue with deletion" (logs out, deletion proceeds)
- Small link: "Why am I seeing this?" → info sheet

11.4 Forced Logout Scenarios — User Experience

Scenario	What User Sees	Copy
User tapped 'Logout'	Return to Welcome Back	(No message needed)
Refresh token expired (7+ days idle)	Welcome Back on next open	"Please log in again"
Suspicious login detected, security logout	Welcome Back + toast	"Signed out for security. Log in again."
Admin suspended account	S-COMMON-SUSPEND	Full suspension screen
Account scheduled for deletion	Reactivation modal on next login attempt	As above
Token blacklisted mid-session	Current screen closes → Welcome Back	Toast: "Session ended. Log in again."

Scenario	What User Sees	Copy
Device changed + single-device preference	Welcome Back on this device	Toast: "Logged in elsewhere. Log in to continue here."

12. Role Selection, Switching & Multi-Role

12.1 S-AUTH-ROL-01 — Role Picker

Purpose	Let user choose which role to operate as
Entry from	OTP success with > 1 role, OR Profile → 'Switch role'
Exit to	Chosen role's home
Shown when	Only if user has multiple roles AND no remembered preference

Elements

- Header: "Continue as"
- Subtitle: "You have access to multiple roles."
- Card per role (large, tappable, full-width):
 - Customer card: blue accent, customer icon
 - Title: "Customer"
 - Subtitle: "Browse vendors and order water"
 - Vendor card: teal accent, vendor icon
 - Title: "Vendor"
 - Subtitle: "Manage <Business Name>"
 - Driver card: orange accent, driver icon
 - Title: "Driver"
 - Subtitle: "Deliver for <Vendor Name>"
 - Admin card: purple accent, admin icon
 - Title: "Admin"
 - Subtitle: "Platform operations"
- Below cards: checkbox "Remember my choice" (unchecked by default)
- Footer: "Logged in as +91 <masked phone>" + "Change number" link

Role card interaction

- Tap role card → (if admin) TOTP challenge first, else confirm switch
- Confirmation modal: "Continue as <role>?"
 - Body: "You'll be taken to the <role> dashboard."
 - Primary CTA: "Yes, continue"
 - Secondary: "Cancel"
- (Skip confirmation if only one role available)

Edge cases

- User has admin role: tapping admin card triggers S-AUTH-TOT-01 (TOTP) first
- User's vendor role has SUSPENDED status: vendor card shown but greyed with badge "Suspended"; tap shows suspension details

- User's driver role has REMOVED status: driver card hidden
- User set Remember Choice previously but wants to switch: accessible from Profile → Switch Role

12.2 S-AUTH-TOT-01 — TOTP Challenge (Admin Only)

Purpose	Second factor for admin role
Entry from	S-AUTH-ROL-01 (admin card tap)
Exit to	Admin dashboard on success

Elements

- Illustration: shield with lock
- Header: "Verify with authenticator"
- Subtitle: "Enter the 6-digit code from your authenticator app."
- 6-box input, numeric
- Primary CTA: "Verify"
- Secondary: "Lost access to authenticator?" (info modal on tap)

Validations and errors

Scenario	Response
Correct code	Proceed to admin dashboard
Wrong code	"Wrong code. Try again." (input clears)
3 wrong	"Too many wrong attempts. Log in again." → returns to role picker
Network error	"Couldn't verify — retry"

12.3 Mid-Session Role Switching

Entry point: Role indicator in header

- Every screen shows role badge top-right: "Customer Mode" / "Vendor Mode" etc.
- Tappable — opens bottom sheet with role picker (smaller version of S-AUTH-ROL-01)

Bottom sheet

- Title: "Switch role"
- Currently active role highlighted with checkmark
- Other roles tappable as cards
- Cancel button at bottom

Switch behaviour

- On tap of new role: confirmation "Switch to <role>? Your current session state will be cleared."
- Confirm → silent re-auth with new role → navigate to new role's home
- App state clears (cart, filters, etc.)

12.4 Role Conflict Rules

Rule	Enforcement
Can't order from your own vendor	Backend blocks at order creation: "You can't order from your own business"
Can't be driver for yourself	Vendor app blocks adding self as driver: "You can't add yourself as a driver"
Admin impersonation	Via admin tool, time-limited, audit-logged
Switching role forces re-auth	Silent if same JWT can be reissued, explicit if session revoked

12.5 Adding a Role (Become Vendor / Customer Later)

Customer → Vendor

- Step 1: Customer opens app, logs in
- Step 2: Profile → "Become a vendor"
- Step 3: Modal: "Add vendor role to this account?"
- Step 4: Confirm → starts vendor onboarding flow (S-VEND-REG-03 onwards)
- Step 5: Phone OTP skipped (already verified)
- Step 6: On approval: next login shows role picker

Vendor → Customer

- Step 7: Vendor opens app, logs in as vendor
- Step 8: Switch role → "Become a customer"
- Step 9: Confirm → customer role added instantly (no verification needed)
- Step 10: Next login: role picker shows both

13. Admin-Light Mobile Access

Admins using the super-app on mobile for on-the-go tasks. Full admin work happens on the web portal.

13.1 Admin-Light Scope

Available on mobile

- Vendor verification (approve/reject)
- Dispute triage (view, basic decisions)
- Surge toggle (on/off)
- Vendor suspension (temporary)
- Compliance alerts (view)
- Basic metrics / dashboard

NOT available on mobile (web portal only)

- Payout override
- User deletion
- Role management (adding/removing admin roles)
- Bulk operations
- Financial reports export
- System configuration

13.2 S-ADMN-LOG-01 — Admin Login Flow

Uses shared phone OTP flow + TOTP challenge (see S-AUTH-TOT-01).

- Same as customer/vendor login, but admin role requires TOTP before dashboard access

13.3 S-ADMN-DSH-01 — Admin Dashboard (Mobile)

Purpose	Quick overview of platform state
Entry from	Login → role picker → admin

Elements

- Top bar: "Admin Mode" badge (purple), date
- KPI cards (2x2):
 - Orders today: count + trend arrow
 - GMV today: ₹ amount
 - Active vendors: count
 - Active disputes: count (red if > 0)

- Alert banner if any critical (platform down, high error rate, etc.)
- Quick action cards:
 - "Vendor verification queue (X pending)" → vendor list
 - "Open disputes (X)" → disputes list
 - "Compliance alerts (X)" → compliance screen
 - "Toggle surge" → surge control
- Tab bar: Overview | Vendors | Disputes | More

13.4 S-ADMN-VEN-LST-01 — Vendor Verification Queue

Entry from

Dashboard card or Vendors tab

Elements

- Filter pills: Pending | Approved | Rejected | Suspended
- Sort: Oldest first (default) / Newest / By tier
- Vendor cards:
 - Business name, tier badge
 - Submitted date
 - Status pill
 - Critical flags (e.g., expired license)
- Tap → S-ADMN-VEN-DET-01

13.5 S-ADMN-VEN-DET-01 — Vendor Verification Detail

Elements

- Business info summary (read-only)
- FSSAI section:
 - License number
 - Expiry
 - Photo (tap to zoom)
 - Action: "Verify on FoSCoS" (opens external link with number pre-filled)
- Other docs sections (same pattern)
- KYC section with ID photos
- Bank details (last 4 digits visible; full requires web portal)
- Decision buttons at bottom:
 - "Approve" (green)
 - "Reject" (red)
 - "Request info" (amber)

Approve flow

- Step 11: Tap Approve
- Step 12: Confirmation modal: "Approve <Business Name>?"
- Step 13: Note field (optional)
- Step 14: TOTP re-verification (security layer)
- Step 15: Submit → vendor status → ACTIVE, notification sent
- Step 16: Toast: "Vendor approved"

Reject flow

- Step 17: Tap Reject
- Step 18: Reason picker (radio): "Documents unclear" | "FSSAI invalid" | "Business not found" | "Other"
- Step 19: Detailed note (required)
- Step 20: TOTP verification
- Step 21: Submit → vendor notified

13.6 S-ADMN-DIS-LST-01 — Disputes List

- Tabs: Open | Under review | Escalated | Resolved
- Sort: Oldest / SLA due / Priority
- Dispute cards:
 - — Ticket # (NEE-CMP-XXXXXX)
 - — Category pill (Quality / Quantity / etc.)
 - — Customer + Vendor names
 - — Time elapsed since filed
 - — SLA indicator (green/amber/red)
- Tap → dispute detail

13.7 S-ADMN-DIS-DET-01 — Dispute Detail

Elements

- Ticket # + category
- Order detail link (collapsed, tap to expand)
- Customer description + photos (scroll through)
- Vendor response (if submitted) + evidence photos
- Decision section:
 - — Radio: Resolve for customer / Resolve for vendor / Partial / Dismiss
 - — Refund amount field (if applicable)
 - — Vendor penalty amount (if applicable)
 - — Award vendor strike toggle
 - — Admin notes (private)
 - — Notification preview (what goes to customer + vendor)

- Primary CTA: "Submit decision" → TOTP re-verify → execute
- Secondary: "Escalate to L2" (pass to senior admin)

13.8 S-ADMN-SUR-01 — Surge Control

Elements

- Current state banner: "Surge: OFF" or "Surge: ON (1.3x)"
- Active triggers list (if on):
 - Trigger name, contribution, scope
 - Toggle per trigger
- Manual override section:
 - "Force surge ON for <city/pincode>"
 - Multiplier slider (1.0 - 1.5)
 - Duration picker
 - Reason input
- Primary CTA: "Apply" → TOTP re-verify
- Warning: "Customers will see surge pricing immediately."

13.9 S-ADMN-MOR-01 — More Menu

- Items:
 - Compliance alerts
 - Vendor suspension (search + suspend)
 - Impersonate user (debug, audit-logged)
 - Switch back to customer/vendor role
 - Audit log viewer (read-only)
 - Open web portal (deeplink with session token)
 - Log out

14. Home & Browse (Customer)

14.1 S-CUST-HOM-01 — Home / Browse

Purpose	Primary customer landing; browse vendors
Entry from	Post-login, tab bar Home, after splash

Elements (top to bottom)

- Top app bar:
 - Left: Hamburger menu icon
 - Center: "Deliver to: <label>, <area>" (tappable; opens address switcher)
 - Right: Notification bell with badge, role mode indicator
- Search bar: "Search vendors or products" (tap opens search screen)
- Surge banner (conditional): "Surge pricing active — subscribers not affected"
- First-order banner (conditional): "₹100 off your first order with code NEERLY100"
- Quick-reorder section (if user has past orders):
 - Horizontal scrollable cards
 - "Reorder from <Vendor>" with product preview + price
- Vendors section header: "Vendors near you"
- Filter chips below header: "All" | "Featured" | "Open now" | "Highest rated" | "Tanker available"
- Vendor cards (scrollable list):
 - Vendor photo or initials-avatar
 - Business name + "Tier-1" or "Tier-2" badge
 - Rating: "★ 4.5 (243)"
 - Delivery time estimate: "20-30 min"
 - Minimum order: "Min ₹100"
 - Distance: "2.1 km"
 - Price range chip: "₹60-120 per 20L"
 - "Closed" overlay with next open time if outside hours
- Bottom tab bar: Home (active) | Orders | Subs | Wallet | Profile

API calls

- GET /api/v1/customer/vendors?pincode=X&lat=Y&lng=Z&sort=ranking
- GET /api/v1/customer/surge/status (for banner)

Loading states

- Initial load: skeleton vendor cards (grey placeholders)
- Pull-to-refresh: standard Android refresh spinner
- Infinite scroll: small loader at bottom

Empty states

Condition	Copy
No vendors in this area	"No vendors here yet" "We're expanding — join the waitlist" CTA: "Notify me"
All vendors closed	"All vendors currently closed" "Next opening: <time>" (no CTA)
Filter returns nothing	"No vendors match these filters" "Try clearing filters" CTA: "Clear filters"

Error states

- Network error: "Couldn't load vendors — pull to refresh"
- Service area change failed: "Couldn't update area — try again"

Address switcher (bottom sheet)

- Triggered: tap on top address bar
- Content: list of saved addresses, primary marked with badge
- Each row: label, building, short address, distance estimate from current location
- '+ Add new address' at bottom
- Tap address → closes sheet, Home refreshes for new area

Edge cases

- User's primary address is now non-serviceable: banner at top "<area> no longer serviceable — choose different address"
- User switches to non-serviceable address: empty-state with message
- Surge applies to all vendors but subscribers see special tag on their subscribed vendor
- New vendor just went live: badge "New" for 7 days

14.2 S-CUST-SEA-01 — Search Screen

Purpose	Search vendors or products
Entry from	Tap search bar on Home

Elements

- Back arrow + search input (auto-focused, keyboard open)
- Recent searches chips (if any)
- Popular searches section
- Results section (updates as user types):
 - — Vendor results
 - — Product results (with vendor shown)

Empty state (no query yet)

- "Search for vendors, products, or 'ice'"
- Popular: "20L jars", "Mineral water", "Tanker service", "Event water"

No results state

- "No results for '<query>'"
- Suggestions: "Try different keywords or browse vendors"
- CTA: "Back to home"

15. Vendor Detail & Product

15.1 S-CUST-VEN-01 — Vendor Detail

Purpose	Vendor's products, info, reviews
Entry from	Tap vendor card on Home or search

Elements

- Header image / banner (vendor's photo or default)
- Back arrow, share icon, favorite heart toggle
- Floating info row on image:
 - Business name (large)
 - Tier badge
 - "★ 4.5 (243 reviews)" (tappable to reviews)
- Info strip below banner:
 - Delivery time to selected address
 - Minimum order
 - Distance
 - "Open until 9 PM" or "Closed — Opens 6 AM"
- FSSAI number: "FSSAI: 12345678901234" (displayed prominently — trust signal)
- Tab selector: "Products" | "Reviews" | "About"

Products tab (default)

- Products grouped by category accordions:
 - "20L Jars" (count in header)
 - "Bottles (1L, 500ml)"
 - "Dispensers"
 - "Tankers"
 - "Event packages"
- Product cards within each group:
 - Product photo (square thumbnail)
 - Name, size, water type
 - Price: ₹60 (prominent)
 - Container mode indicator: 'Keep' or 'Transfer-return'
 - "+" or "Add" button → add to cart
- Floating cart bar at bottom (appears when items added):
 - "X items in cart"
 - "View cart" button
 - Small total amount shown

Reviews tab

- Aggregate rating at top: big number + star, breakdown by star (5/4/3/2/1 with bar graph)
- Two sub-ratings shown: Vendor experience, Water quality (each with their own avg)
- Filter chips: "All" | "5 star" | "4 star" | "With photos" | "Recent"
- Review cards:
 - — Customer initials avatar + first name
 - — Ratings (2 rows: vendor, water)
 - — Review text
 - — Vendor's response (if any), with vendor badge
 - — Date

About tab

- Business description
- Address (with map preview)
- Business hours table
- Contact info: phone (call button)
- Compliance badges: FSSAI verified, Partner verified
- Years in business
- Total orders delivered

15.2 S-CUST-VEN-PROD-01 — Product Detail (Bottom Sheet)

Purpose	Full product details before adding to cart
Entry from	Tap product card on vendor detail

Elements

- Bottom sheet (swipe down to close)
- Product photo carousel (if multiple)
- Name, size, water type
- Price: "₹60" + per-unit clarification if needed
- Description text
- Container policy section (if applicable):
 - — Radio: "Keep the container (₹400 deposit)" | "Transfer to my container"
 - — Info expand: "Deposit refunded when you return container within <N> days"
- Quantity stepper: - [1] +
- Availability info: "Available until 9 PM today" or "Out of stock"
- Total calculation: "₹60 × 2 + ₹800 deposit = ₹920"
- Primary CTA: "Add to cart" (bottom, full-width)

Edge cases

- Quantity exceeds daily capacity: "Only X available today" — clamp qty

- Product becomes OUT_OF_STOCK while sheet open: "This product just went out of stock" → disable add
- Container mode options depend on product: toggle hidden if only one mode

16. Cart & Checkout

16.1 S-CUST-CRT-01 — Cart

Purpose	Review items before checkout
Entry from	Floating cart bar, Home cart icon

Elements

- Top bar: "Your cart" + close arrow
- Vendor name card: logo, name (only one vendor per cart — multi-vendor in V1.1)
- Line items:
 - Photo, name, size
 - Qty stepper (- [2] +)
 - Unit price × qty = subtotal for item
 - Container mode indicator + edit link
 - Swipe-left to delete item
- Promo code section (collapsed):
 - "Have a promo code? Apply" (expand)
 - Expanded: input + Apply button
 - Applied state: "NEERLY100 applied (-₹100)" + X to remove
- Bill summary (prominent):
 - "Subtotal: ₹120"
 - "Delivery fee: ₹25" (strike-through if free subscriber, or shows "FREE" if over ₹400 threshold)
 - "Surge surcharge: ₹12" (only if active, with info icon)
 - "Deposit: ₹800" (with info icon: "Refundable on container return")
 - "Discount: -₹100" (if promo)
 - Divider line
 - "Total: ₹857" (large, bold)
- Delivery to section:
 - Address card + "Change" link
- Requested slot:
 - "As soon as possible" (default radio)
 - "Choose a slot" → opens slot picker
- Delivery instructions: free-text field, placeholder "Any special instructions?"
- Primary CTA: "Proceed to Pay — ₹857" (bottom)

Validations

Condition	Message
Below minimum order	"Add ₹<difference> more — minimum order is ₹<min>" + CTA disabled
Vendor now closed	"Vendor just closed. Try again at <next opening>"
Product unavailable	"One or more items are no longer available" + X to remove
Surge changed since adding	"Surge updated — total is now ₹<new>"
Invalid promo	"Code invalid or expired"

Empty cart

- "Your cart is empty"
- "Add items to get started"
- CTA: "Browse vendors"

16.2 S-CUST-CHK-01 — Checkout / Payment Method

Purpose	Choose payment method
Entry from	Cart Proceed tap

Elements

- Top bar: "Checkout" + back arrow
- Order summary card (collapsed, tap to expand)
- Total prominent: "Pay ₹857"
- Payment method radio list:
 - UPI (default) → opens Razorpay Checkout with UPI apps
 - Card → opens Razorpay Checkout with card entry
 - Wallet: "Pay from Wallet (balance ₹230)" — only enabled if balance >= total; shows deficit warning otherwise
 - Cash on Delivery — "₹20 COD fee applies"
- Terms reminder: "By paying you agree to Neerly's cancellation policy" (link)
- Primary CTA: "Pay ₹857" (amount updates based on method, e.g., +₹20 for COD)

Validations

Method	Validation
UPI	None client-side (Razorpay handles)
Card	None client-side

Method	Validation
Wallet	Balance >= total; otherwise disabled with message "Need ₹<deficit> more in wallet"
COD	Some vendors may not accept COD — hidden if vendor doesn't offer

16.3 S-CUST-CHK-02 — Razorpay Checkout Overlay

Razorpay-provided UI, not ours. Users select UPI app, enter PIN, etc.

- On success: returns to our app, routes to S-CUST-CHK-03
- On failure: returns to our app, shows error modal (see below)

Error handling post-Razorpay

Error	Copy
Payment declined	"Payment failed. Try another method." → back to checkout
Network dropped mid-payment	"We're not sure if your payment went through. We'll update you shortly." → shows pending screen
User cancelled Razorpay	Silent return to checkout (no error)

16.4 S-CUST-CHK-03 — Order Placed Confirmation

Purpose	Confirm order placement
Entry from	Razorpay success (or COD / wallet direct success)
Exit to	S-CUST-TRK-01 (tracking) on continue

Elements

- Green checkmark animation (large)
- Header: "Order placed!"
- Order number: "Order #NEE-2026-042200001"
- Current status: "Finding nearest vendor..." + spinner
- Receipt-style summary (condensed)
- Estimated delivery: "<time range>"
- Primary CTA: "Track order" → S-CUST-TRK-01
- Secondary: "Back to home"

17. Order Tracking

17.1 S-CUST-TRK-01 — Live Tracking

Purpose	Real-time order status + driver tracking
Entry from	Post-checkout, Orders list, push notification

Elements (state-dependent)

- Top bar: order #, close arrow
- Status stepper (horizontal): 5 dots labeled Placed → Accepted → Preparing → Dispatched → Delivered
- Current step highlighted + ETAs under each
- Status-specific content below (see state table)
- Driver info card (when dispatched):
 - — Driver photo / initials
 - — Name + vehicle
 - — Call button (masked number)
 - — Chat button (V1.1)
- OTP card (prominent, when dispatched):
 - — Large 4-digit OTP
 - — "Share this with driver when they arrive"
- Map (when dispatched):
 - — Driver icon (real-time moving)
 - — Customer marker (destination)
 - — Route line
 - — ETA label above driver
- Order summary (collapsed, expandable)
- Actions:
 - — "Cancel order" (only if status allows + within grace)
 - — "Contact vendor" (phone link)
 - — "Report issue" (once delivered)

Status-specific states

Status	Display
PLACED	"Finding a vendor..." + spinner; no map
VENDOR_ASSIGNED	"Notifying vendor" + 3-min countdown
VENDOR_REJECTED	"Trying another vendor..." (silent if auto-retry)
VENDOR_ACCEPTED	"Vendor accepted! Preparing your order" + vendor info
PREPARING	"Your order is being prepared" + vendor info

Status	Display
DISPATCHED	Map appears + driver info + OTP prominent
ARRIVING	Banner: "Driver arriving in <N> min" (prominent)
DELIVERED	Celebration animation + "Delivered at <time>" + "Rate your experience" CTA
CANCELLED	"Order cancelled — <reason>" + "Refund status: <state>" + support button

Cancel order flow

- Step 22: Tap Cancel
- Step 23: Confirmation modal: "Cancel this order?"
- Step 24: If in grace: "Full refund will be processed."
- Step 25: If after grace (vendor accepted): "Cancellation fee of ₹<X> applies."
- Step 26: Optional reason picker
- Step 27: Confirm → order cancelled, refund initiated, user sees cancellation state

Edge cases

- Firestore listener drops: app falls back to polling backend every 15s (invisible to user)
- User closes and reopens app: resumes at current state from backend
- Order delivered while user was away: opens to delivered state with review prompt

18. Order History & Detail

18.1 S-CUST-HIS-01 — Orders List

Entry from	Tab bar 'Orders'
------------	------------------

Elements

- Top bar: "Your orders"
- Tab selector: "All" | "Active" | "Completed" | "Cancelled"
- Search bar: "Find an order by number or vendor"
- Date range filter: "This week" | "This month" | "Custom"
- Order cards (most recent first):
 - Order # + placed date
 - Vendor logo + name
 - Products summary (e.g., "2× 20L Jar")
 - Total amount
 - Status pill (colored: green delivered, amber active, red cancelled)
- Pull to refresh
- Infinite scroll

Empty states

- No orders ever: "No orders yet" + CTA "Browse vendors"
- No active orders: "No active orders" + link to completed
- Search no results: "No orders match '<query>'"

18.2 S-CUST-HIS-02 — Order Detail

Elements

- Top bar: order # + back arrow
- Status timeline (vertical for detail): each stage with timestamp
- Delivery photo (if delivered, large)
- Pickup photo (if container returned during delivery)
- Order items (read-only list)
- Bill summary (same structure as cart)
- Payment info: method + last 4 digits / UPI id masked
- Delivery info: address, driver name (masked contact)
- Timeline of events: ordered, accepted, dispatched, delivered
- Invoice link: "Download invoice (PDF)" → fetches and opens
- Actions (state-dependent):
 - Active: "Track" (→ S-CUST-TRK-01), "Cancel" (if allowed)
 - Delivered: "Reorder", "Rate & review", "Report issue"

- — Cancelled: "View refund status", "Reorder"

19. Subscriptions

19.1 S-CUST-SUB-01 — Subscriptions List

Entry from	Tab bar 'Subs'
------------	----------------

Elements

- Top bar: "Your subscriptions"
- Education banner (for first-time users): "Save time with recurring deliveries — 10% off* per order" (*if applicable)
- Active subscriptions cards:
 - — Vendor logo + name
 - — Product: "2× 20L Plain Jar"
 - — Frequency: "Every alternate day at 7-9 AM"
 - — Next delivery: "Tomorrow (Apr 23)"
 - — Status pill: Active / Paused / Scheduled to end
 - — Quick actions row: "Skip today" | "Pause" | "Details"
- Floating action button: "+ New subscription"

Empty state

- "No subscriptions yet"
- "Save time with recurring deliveries"
- CTA: "Create subscription"

19.2 S-CUST-SUB-02 — Create Subscription (Wizard)

Multi-step with back navigation.

Step 1: Choose Vendor

- Header: "Choose a vendor"
- Preferred vendors (ordered from before) shown first
- All serviceable vendors listed below
- Filter: "Rating 4+", "Delivery in morning", etc.

Step 2: Choose Product

- Products from chosen vendor
- Quantity stepper per product
- Container mode (if applicable)

Step 3: Frequency

- Radio: Daily | Alternate days | Twice weekly | Weekly | Custom
- If Custom: day checkboxes (M T W T F S S)

Step 4: Delivery Slot

- Time picker showing vendor's slot options (e.g., 6-9 AM, 9-12 PM, 2-5 PM, 5-9 PM)
- Capacity indicator per slot: "High" / "Medium" / "Full"
- Full slots disabled with "Full" label

Step 5: Address

- Pre-selected: primary address
- Can change

Step 6: Start Date

- Date picker, default tomorrow
- Min: tomorrow (not same day)
- Max: 30 days from now

Step 7: Payment Mode

- Radio:
 - "UPI AutoPay (recommended)" — automatic monthly billing
 - "Prepaid wallet" — balance debited per delivery
 - "Postpaid monthly (V1.1)" — greyed
- If UPI AutoPay selected: "Set up mandate" → redirects to Razorpay mandate flow

Step 8: Review

- Summary of all choices
- Monthly estimate: "Approx ₹2,100/month (30 deliveries)"
- Terms: "I understand I can pause, skip, or end this subscription anytime"
- Primary CTA: "Create Subscription"

Success screen

- "Subscription active from <date>"
- "First delivery on <date> between <slot>"
- CTA: "Done"

19.3 S-CUST-SUB-03 — Subscription Detail

Elements

- Header: product + vendor
- Status card: Active / Paused (with resume date)
- Schedule: frequency, slot, next delivery
- Monthly estimate + payment mode
- Upcoming deliveries (next 7 days) with skip toggle per date
- Recent deliveries (last 30 days) with status per delivery

- Action sheet:
 - — "Skip specific dates"
 - — "Pause"
 - — "Modify" (quantity, slot, address)
 - — "Switch vendor"
 - — "End subscription" (destructive)

19.4 S-CUST-SUB-04 — Skip Dates

- Calendar widget for current + next month
- Tap dates to toggle skip
- Selected dates shown as chips above calendar
- Info: skips before 10 PM previous day are free; after = 50% fee
- Fee warning shown if late skip
- Primary CTA: "Confirm skips"

19.5 S-CUST-SUB-05 — Pause

- Date range picker: pause from / pause until
- Max 30 days allowed
- Reason (optional radio list)
- Info: "No deliveries during pause; AutoPay charges skip too"
- Primary CTA: "Pause subscription"

19.6 S-CUST-SUB-06 — End Subscription

- Warning: "End this subscription?"
- Body: "You'll stop receiving deliveries. You can create a new subscription anytime."
- Reason picker (optional)
- Primary CTA: "End subscription" (destructive red)
- Secondary: "Cancel"
- Confirmation: "Subscription ended"

20. Returns & Deposits

20.1 S-CUST-RET-01 — Deposits Dashboard

Entry from

Profile → 'My deposits' OR Wallet tab section

Elements

- Top bar: "Your deposits"
- Summary card: "₹2,400 held in deposits (3 containers)"
- Active deposits list:
 - Product + vendor
 - Amount
 - Status pill: Active / Overdue / Grace / Forfeit pending
 - Countdown: "Return in 2 days" OR "Overdue by 1 day — grace ends tomorrow"
 - Primary action: "Return container" → S-CUST-RET-02
- Past deposits (collapsible): refunded / forfeited

Empty state

- "No active deposits"
- "You have no containers to return."
- (No CTA)

20.2 S-CUST-RET-02 — Schedule Return

Elements

- Header: "How would you like to return?"
- Option 1: "Schedule pickup"
 - Date picker + slot picker
 - Pickup fee info: "₹25 pickup fee" (or "Free" if vendor offers)
- Option 2: "Auto-pickup on next delivery" (only if subscribed to this vendor)
 - "Container will be picked up during your subscription delivery on <date>"
- Option 3: "Drop off at vendor"
 - Vendor location map + distance
 - Bonus info: "Get ₹20 wallet credit for dropping off"
- Primary CTA: "Confirm return"

Edge cases

- No subscription: Option 2 hidden
- Vendor doesn't offer pickup: Option 1 hidden
- Vendor drop-off only in certain hours: show vendor hours

20.3 S-CUST-RET-03 — Forfeit Dispute

- Triggered by push: "Vendor requested deposit forfeit. Dispute within 7 days."
- Screen elements:
 - — Vendor's reason + photos
 - — Your options: Accept (lose deposit) / Dispute (admin review)
 - — Dispute form: explanation + photos upload
- Primary CTA: "Submit dispute"

21. Wallet

21.1 S-CUST-WAL-01 — Wallet Home

Entry from	Tab bar 'Wallet'
------------	------------------

Elements

- Balance card (prominent): "₹230" large font
- Actions row: "+ Add money" | "View transactions" | "View deposits"
- Recent transactions (last 10):
 - Icon (credit ↑ / debit ↓)
 - Description
 - Amount (colored: green credit, red debit)
 - Date
- Link: "See all transactions"

21.2 S-CUST-WAL-02 — Add Money

- Amount input (numeric)
- Quick select chips: ₹200, ₹500, ₹1000, ₹2000
- Validation: min ₹100, max ₹10,000 without KYC
- If near limit: info box "Complete KYC to increase limit to ₹1,00,000"
- Primary CTA: "Add ₹<amount>" → Razorpay
- Success: balance updates, toast "₹<amount> added to wallet"

21.3 S-CUST-WAL-03 — Transactions History

- Infinite scroll list
- Filter: All | Credits | Debits | By type
- Each transaction: description, amount, date, reference (order # etc.)
- Tap → detailed view with receipt

22. Profile & Settings

22.1 S-CUST-PRF-01 — Profile Home

Entry from	Tab bar 'Profile'
------------	-------------------

Elements

- Avatar (initials or photo)
- Name, phone (masked), email
- Edit profile icon
- Section links:
 - — Addresses (X saved)
 - — Payment methods
 - — Subscriptions
 - — Deposits
 - — Notifications
 - — Language
 - — Help & Support
- Referral card: "Invite a friend — you both get ₹75" with code + Share button
- Danger zone (at bottom, muted):
 - — Logout
 - — Delete account
- Footer: Terms, Privacy, About, Version

22.2 S-CUST-PRF-02 — Edit Profile

- Name (editable)
- Email: add/change → verification email sent
- Phone: display only ("To change phone, contact support")
- Profile photo: upload/change

22.3 S-CUST-PRF-03 — Addresses Management

- List of saved addresses
- Primary address badge
- Tap → edit
- Tap Edit in list → address edit screen
- '+ Add new address' button
- Long-press or swipe → Delete (with confirmation)
- Tap "Set as primary" if not primary
- Delete blocked if active orders/subs: "Can't delete — has active orders/subs"

22.4 S-CUST-PRF-04 — Notification Preferences

- Toggles:
 - — Push notifications
 - — SMS notifications
 - — Email notifications
 - — Marketing & promotions (separate)
- Per-category controls (V1.1): order updates, subscriptions, deposits, promos

22.5 S-CUST-PRF-05 — Delete Account Flow

Step 1: Warning

- Header: "Delete your Neerly account?"
- What's deleted: profile, addresses, subscriptions (stopped)
- What's retained: financial records (anonymized, 7 years per tax law)
- Timeline: "30-day cooling off period — logging back in restores the account"
- Primary CTA: "Continue deletion"
- Secondary: "Cancel"

Step 2: Feedback (optional)

- "Why are you leaving?"
- Radio: Too expensive / Service issues / Moving / Not using / Other
- Free text: "Anything you'd like us to know?"
- Skip button

Step 3: OTP Confirmation

- "Enter OTP to confirm"
- Primary CTA: "Delete my account"

Step 4: Cooling-Off Notice

- Illustration: calendar with 30 days marked
- "Your account will be deleted on <date + 30>."
- "Log in before then to cancel."
- Signed out automatically

23. Reviews & Complaints

23.1 S-CUST-REV-01 — Write Review

Entry from

Auto-prompt after delivery OR Order Detail → 'Rate'

Elements

- Header: "How was your experience?"
- Vendor info card (logo + name)
- Vendor experience rating: 5 stars, tap to select
- Water quality rating: 5 stars, separate row
- Optional: written review (500 char): placeholder "Tell us about your experience"
- Character counter
- Toggle: "Share anonymously"
- Primary CTA: "Post review" (disabled until both ratings set)
- Info: "You can edit your review for 24 hours after posting."

Success

- Toast: "Review posted"
- Return to order detail

23.2 S-CUST-CMP-01 — File Complaint

Entry from

Order Detail → 'Report Issue'

Elements

- Header: "What went wrong?"
- Category selection (card-style radio):
 - Water quality issue
 - Wrong quantity
 - Wrong product
 - Container damaged at delivery
 - Delivery delay (> 2hr)
 - Driver behaviour
 - Other
- Description (required, min 20 chars): "Describe what happened"
- Photo upload (up to 5): "Add photos"
- What do you want? radio:
 - "Refund (full)"
 - "Refund (partial)"
 - "Replacement delivery"

- — "Apology only"
- Primary CTA: "Submit complaint"

Success

- "Ticket NEE-CMP-XXXXX created"
- "We'll respond within 12-24 hours"
- CTA: "Done" → return to order detail

23.3 S-CUST-CMP-02 — Complaint Detail

- Ticket # + current status
- Status timeline: Filed → Vendor responding → Admin reviewing → Resolved
- SLA countdown: "Response expected within <time>"
- Vendor's response (when received)
- Admin's decision (when resolved)
- Resolution details: refund amount, replacement info
- Actions: "Appeal" (if dissatisfied with resolution)

24. Vendor Dashboard

24.1 S-VEND-DSH-01 — Active Dashboard

Entry from	Login, tab bar Dashboard
------------	--------------------------

Elements

- Top bar: business name, role badge (Vendor, teal), notification bell, profile icon
- Today's summary cards (2x2 grid):
 - "Orders today: 12" → orders screen
 - "Revenue today: ₹2,450"
 - "Pending acceptance: 1" (pulsing red if > 0) → incoming order
 - "Subs due today: 8" → subscriptions today
- Surge banner (if active): "Surge in effect: ₹<amount> per order"
- Live order feed:
 - "Current orders" section
 - Each row: Order #, customer area, products, status pill, action (accept/dispatch/etc.)
- Today's subscription deliveries:
 - Grouped by slot: "6-9 AM (3 orders)" expandable
 - Each: customer name, product, address
- Quick actions row:
 - "Close early" button
 - "Add driver"
 - "Today's pickups"
- Compliance alert banner (if any doc expiring within 30 days)
- Tab bar: Dashboard | Orders | Catalog | Earn | More

24.2 S-VEND-DSH-PENDING — Pending Verification State

- Illustration: document being reviewed
- Header: "Your application is under review"
- Body: "Our team is verifying your details. Typically takes 24-48 hours."
- Reference: "Application ID: <VND-XXX>"
- For Tier-2: progress stepper showing partner work stages
- Support link: "Questions? Contact us"
- Limited tab bar: only Dashboard + More (to reach settings/support)

24.3 S-VEND-DSH-OFFBOARD — Offboarding Wind-Down

- Top banner (yellow): "Offboarding mode — <N> days remaining"
- Active subscriptions to complete (list with countdown)

- Pending deposits awaiting return
- Unpaid earnings balance
- Cannot accept new on-demand orders (CTA disabled with explanation)
- "Cancel offboarding" link (if within grace period, e.g., first 7 days)

25. Incoming Order (3-Min Acceptance)

25.1 S-VEND-ORD-INC-01 — New Order Alert

Purpose	Critical — vendor must accept/reject within 3 minutes
Entry from	FCM push (loud alert + vibration), dashboard card tap

Elements

- Full-screen modal (cannot dismiss with back button)
- Alert sound (distinctive, plays once)
- Vibration pattern
- Large countdown timer: "3:00" → "0:00" (turns red at 30s)
- Progress ring around timer
- Order details card (scrollable if long):
 - "New order #NEE-2026-042200001"
 - Customer area (not full address — privacy): "Jubilee Hills"
 - Distance: "2.3 km"
 - Products list: "2× 20L Plain Jar"
 - Payment: "UPI — ₹845"
 - Requested slot: "ASAP"
- Two large action buttons:
 - Left (grey): "Reject"
 - Right (green, larger): "Accept"

Accept action

- Step 28: Tap Accept
- Step 29: Button loads: "Accepting..."
- Step 30: On success: modal closes, order appears in current orders list, toast "Order accepted"
- Step 31: Backend captures payment, customer notified

Reject action

- Step 32: Tap Reject
- Step 33: Bottom sheet: "Why are you rejecting?"
- Step 34: Radio: "Too far from service area" | "Out of stock" | "Out of capacity" | "Other"
- Step 35: If Other: free-text field
- Step 36: Confirm reject → backend routes to next vendor
- Step 37: Modal closes, toast: "Order passed to next vendor"

Timeout behaviour

- At 0:00: modal auto-closes
- Backend treats as TIMED_OUT

- Toast shown after close: "Order missed — passed to next vendor"
- Small badge on dashboard increments "Missed orders: X"

Edge cases

- Multiple orders arrive simultaneously: queue shown; first accepted, others in pending
- Vendor app backgrounded: push notification brings it forward
- Vendor app force-closed: push still arrives; on tap, app opens directly to this modal
- Network drops mid-accept: "Accepting..." stays, retries automatically; if fails 3x → "Couldn't confirm — check orders list"

26. Vendor Order Management

26.1 S-VEND-ORD-LST-01 — Orders List

Entry from	Tab bar 'Orders'
------------	------------------

Elements

- Tabs: All | Active | Completed | Cancelled | Today | Week
- Search: "Order # or customer area"
- Sort: Latest / By slot / By value
- Order cards:
 - — Order # + placed time
 - — Customer area + distance
 - — Products summary + total
 - — Payment method
 - — Status pill + next-action hint ("Accept", "Ready", "Dispatch")
- Tap → S-VEND-ORD-DET-01

26.2 S-VEND-ORD-DET-01 — Order Detail

Elements

- Header: order #, status, placed time
- Customer info card (masked phone + call button): area + full address
- Products list with container mode per item
- Payment breakdown
- Status timeline
- Next action CTA (status-dependent, prominent):
 - — VENDOR_ACCEPTED: "Mark ready for dispatch"
 - — PREPARING: "Assign driver"
 - — DISPATCHED: shows driver + OTP + live location
- Secondary actions:
 - — "Cancel (incurs penalty if already accepted)"
 - — "Call customer"
 - — "Flag issue"

Cancel after acceptance flow

- Step 38: Tap Cancel
- Step 39: Warning modal: "Cancelling an accepted order incurs a penalty of ₹<amount> + a strike against your rating."
- Step 40: Reason picker: "Product unavailable" | "Staff issue" | "Emergency" | "Other"
- Step 41: Confirm

Step 42: Toast: "Order cancelled. Customer refunded."

26.3 S-VEND-ORD-DISPATCH-01 — Driver Assignment

Entry from	Order detail → 'Assign driver'
------------	--------------------------------

Elements

- Bottom sheet: "Assign driver"
- Tabs: On-duty | Off-duty
- On-duty drivers list:
 - Driver name + photo
 - Current deliveries count (e.g., "2 active")
 - Distance to customer (estimated)
 - Availability indicator
- Tap driver → confirmation "Assign <driver> to this order?"
- On confirm: driver gets push, order moves to DISPATCHED

Edge cases

- No on-duty drivers: banner "No drivers on shift — start one or call" + links
- Driver too busy (4+ active): warning but allowed

27. Vendor Catalog Management

27.1 S-VEND-CAT-LST-01 — Catalog

Entry from	Tab bar 'Catalog'
------------	-------------------

Elements

- Top: Stats row "X products — Y available now"
- Floating '+ Add product' button
- Filter chips: All / Available / Out of stock / Paused
- Product grid (2 columns):
 - Product card: photo, name, size, price
 - Status pill: Available (green) / Out of stock (amber) / Paused (grey)
 - Quick toggle: Available ⇌ Out of stock
 - Tap → edit

27.2 S-VEND-CAT-ADD-01 — Add Product (Wizard)

Multi-step wizard.

Step 1: Choose from Platform Templates

- Search: "Type to find"
- Categories shown as collapsible:
 - 20L Jars (Plain / Cool / Chilled / RO / Mineral)
 - Bottles (1L, 2L, 500ml)
 - Dispensers
 - Tankers (1000L, 2000L, 5000L)
 - Event packages (V1.2)
- Tap template → go to step 2

Step 2: Set Price

- Platform band shown: "Price band: ₹60 - ₹120"
- Price input with live band validation
- Error if outside band: "Price must be between ₹60 and ₹120"

Step 3: Photo

- Upload from camera or gallery
- Preview with retake option
- Quality check

Step 4: Description (optional)

- Free text, 500 chars

- Placeholder: "What makes this product special?"

Step 5: Container Policy

- Keep mode toggle: "Customer keeps container"
- — If on: deposit amount (within platform band) + retention hours
- Transfer-return mode toggle
- Late fee: default 10% per day (editable)
- Grace period hours: default 48 (editable)

Step 6: Return Modes

- Checkboxes:
- — Scheduled pickup
- — Drop-off at shop
- If pickup: fee type (Free / Flat / Distance-tiered) + amount
- If drop-off: bonus amount to customer

Step 7: Availability

- Available all day (toggle)
- Or: time range picker (start/end)
- Daily capacity: number input

Step 8: Review & Save

- Summary of all settings
- Primary CTA: "Add to catalog"

27.3 S-VEND-CAT-EDIT-01 — Edit Product

- Same wizard pre-filled
- Delete button in footer (with warning if has active subscriptions or deposits)

28. Vendor Team & Drivers

28.1 S-VEND-TEA-LST-01 — Team

Entry from

More → Team

Elements

- Stats: "X drivers — Y on shift"
- '+ Add driver' button
- Driver cards:
 - Name, phone (masked), vehicle type
 - Status pill: Off-duty / On-duty / Delivering / Invited / Removed
 - Live indicator dot if delivering
 - Today's deliveries count, COD collected today
- Tap → driver detail

28.2 S-VEND-TEA-ADD-01 — Add Driver

Elements

- Header: "Add driver"
- Phone (+91 + 10 digits)
- Driver name
- Driving license number
- DL photo upload
- Vehicle type dropdown
- Vehicle registration
- Primary CTA: "Send invite"

Success

- "Invite sent to <driver phone>"
- Driver appears in team list with status "Invited"
- Once driver logs in: status → "Off-duty" (onboarding complete)

28.3 S-VEND-TEA-DET-01 — Driver Detail

- Profile info (name, phone masked, vehicle)
- Performance metrics: on-time %, deliveries completed, avg rating from customers
- Today's assignments list
- Weekly summary chart
- COD reconciliation status

- Actions: "Remove driver" (confirmation: "This will revoke driver's access. Confirm?")

29. Vendor Subscription Today-List

29.1 S-VEND-SUB-TODAY — Today's Subscriptions

Entry from	Dashboard card OR 6 AM push
------------	-----------------------------

Elements

- Header: "Today's deliveries"
- Summary: "Total: 8 deliveries across 4 slots"
- Grouped by slot (accordions):
 - — "6-9 AM (3 deliveries)"
 - — Each delivery row: customer name, product, address snippet, status pill, actions
- Bulk actions per slot:
 - — "Assign all to driver"
 - — "Dispatch all"
- End-of-day check-in prompt (9 PM):
 - — Modal: "Confirm today's deliveries"
 - — List with radio per delivery: Delivered / Missed / Partial
 - — Primary: "Submit check-in"
 - — Missed deliveries: credit issued to customer automatically

30. Vendor Returns, Pickups & Damage Claims

30.1 S-VEND-RET-LST-01 — Returns Dashboard

Elements

- Tabs: Scheduled pickups | Drop-offs awaiting | Completed today
- Scheduled pickups list:
 - Customer + address + slot
 - Actions: Accept (assign driver) / Propose alternate slot / Cancel
- Drop-offs awaiting list:
 - Customer + expected time
 - Primary action: "Confirm drop-off" → photo required
- Completed today: reference list

30.2 S-VEND-RET-DMG-01 — Raise Damage Claim

Entry from

During pickup completion by driver OR manual via return detail

Elements

- Header: "Damage claim"
- Context: order #, customer name, product
- Category radio:
 - "Minor scratches (10% deduction)"
 - "Broken tap (30%)"
 - "Broken handle (50%)"
 - "Cracked body (100%)"
 - "Lost/not returned (100%)"
- Photos (required, 2-4): camera upload
- Optional note: "Describe the damage"
- Deduction preview: "Deposit: ₹400 → Refund: ₹200 (50% deducted)"
- Primary CTA: "Submit claim"

Post-submission

- Customer gets notification with 48-hour dispute window
- Claim appears in vendor's claims list with status PENDING_CUSTOMER

31. Vendor Earnings & Payouts

31.1 S-VEND-EAR-01 — Earnings Dashboard

Entry from	Tab bar 'Earn'
------------	----------------

Elements

- Period selector: Today | This week | This month | Custom
- Hero metrics (stacked):
 - Gross: ₹12,450
 - Commission (-₹1,245)
 - Gateway fees (-₹249)
 - TCS (-₹124)
 - Net earning: ₹10,832 (large)
- Bar chart: daily earnings for period
- Next payout card: "Pending payout: ₹8,200 — expected Monday"
- Instant payout option (V1.1): "Get ₹8,200 now for ₹82 fee"
- Links: "Order-wise breakdown" | "Payout history" | "Download statement (PDF)"

31.2 S-VEND-EAR-ORD-01 — Per-Order Breakdown

- List of orders for period
- Each row: Order #, gross, commission rate, net
- Tap row → line-item detail modal

31.3 S-VEND-EAR-PAY-01 — Payout History

- List of past payout runs
- Each row: Week dates, net amount, status pill
- Statuses: Completed / Processing / Held / Failed
- Tap row → line items in that payout + downloadable statement
- Held/Failed has prominent reason + "Contact support" CTA

32. Vendor Business Settings

32.1 S-VEND-SET-01 — Settings Hub

Entry from

More → Business Settings

Sections (tappable rows)

- Business profile (name, address, hours, etc.)
- Service area
- Business hours & holidays
- Slot capacity
- Emergency close
- Bank details (read-only; change requires support)
- Tax settings
- Notification preferences
- Language
- Delete / Offboard business (danger zone)

32.2 S-VEND-SET-HRS-01 — Hours & Holidays

- Per-day open/close time pickers
- Lunch break toggle + pickers per day
- Sunday off toggle
- Holiday section: '+ Add holiday' → date picker + reason
- Each holiday: toggle "Limited capacity" with % slider
- Primary CTA: "Save changes"

32.3 S-VEND-SET-CLO-01 — Emergency Close

- Warning banner: "This stops new orders immediately"
- Duration radio: 1 hour / 4 hours / Rest of day / Until I re-open
- Reason input
- Impact preview: "X pending orders will continue; Y subscriptions today will be notified"
- Primary CTA: "Close shop" (destructive red)
- Active subscriptions get sabbatical-day credit automatically

32.4 S-VEND-SET-OFF-01 — Offboarding

Step 1: Understanding

- Warning card: "Offboarding is a 30-day wind-down process"

- What happens:
 - "Active subscriptions continue to be served"
 - "No new orders accepted"
 - "Pending deposits returned"
 - "Final payout issued"
 - "After 30 days, your vendor account is closed"

Step 2: Reason

- Optional radio + free text

Step 3: OTP Confirm

- OTP to registered phone
- Primary CTA: "Start offboarding"

Post-confirmation

- Dashboard switches to offboarding mode (Section 24.3)

33. Vendor Compliance

33.1 S-VEND-COMPL-01 — Compliance Dashboard

Entry from	More → Compliance
------------	-------------------

Elements

- Alert banners at top (if any docs expiring):
 - — Red: expired
 - — Amber: expires in < 7 days
 - — Yellow: expires in < 30 days
- Documents list (grouped by status):
 - — Mandatory (FSSAI, PAN, Shop Establishment, GSTIN if applicable)
 - — Optional (Trade license, Groundwater permit)
- Per-document card:
 - — Document type
 - — Number (masked for sensitive)
 - — Status pill: Verified / Pending / Rejected / Expired
 - — Expiry date + countdown
 - — CTAs: View photo / Renew / Replace
- Past batch tests (V1.1): quarterly water quality test records
- '+ Upload document' button

34. Driver Home & Shift

34.1 S-DRIV-HOM-01 — Off-Duty State

Entry from	Login, tab bar 'Today'
------------	------------------------

Elements

- Status card: "Off-duty" + orange indicator
- Large CTA: "Start shift"
- Yesterday's summary: "Delivered X | COD collected ₹Y"
- Vendor info: logo, name, phone (call button)
- Tab bar: Today (active), History, Profile

34.2 S-DRIV-HOM-02 — On-Duty, Idle

- Status card: "On-duty" + green
- Animation: "Waiting for deliveries..."
- Today's stats: deliveries done, time on shift, COD collected
- "End shift" button (secondary)
- GPS tracking indicator

34.3 S-DRIV-HOM-03 — On-Duty with Assignments

- Status card: "On-duty — X deliveries today"
- Today's deliveries list sorted by slot
- Each card: customer area, products, slot, status
- Current delivery highlighted at top with "Continue" CTA
- Upcoming: scrollable list

34.4 S-DRIV-SHF-START — Start Shift

- Permissions pre-check
- Confirmation: "Start shift?"
- On confirm: status flips, GPS starts

34.5 S-DRIV-SHF-END — End Shift

- If active deliveries: "You have X active. Reassign first?" (contacts vendor)
- Today's summary
- COD reconciliation if cash collected

- Primary CTA: "End shift"

35. Delivery Execution

35.1 S-DRIV-DEL-01 — New Assignment Alert

- Sound + vibration
- Bottom sheet with order details:
 - — Order # + customer name
 - — Products
 - — Customer address + distance
 - — Payment method (COD amount if COD)
 - — Slot
- Actions: Accept / Start navigation

35.2 S-DRIV-DEL-02 — Delivery in Progress

- Order summary collapsed at top
- Large map: driver location + destination + route
- "Open in Google Maps" button
- Address with "Copy" button
- Customer phone (masked) with "Call" button
- Distance + ETA
- Bottom actions: "Arrived" (when close) / "Mark failed"

35.3 S-DRIV-DEL-03 — Complete Delivery

Elements (multi-step on single screen)

- Title: "Complete delivery"
- Customer info card
- Step 1: "Take delivery photo" button (required)
 - — Opens native camera
 - — Preview with retake option
- Step 2 (if container return): "Take pickup photo" (required)
- Step 3 (if damage): "Report damage" link → claim flow
- Step 4: "Enter OTP from customer"
 - — 4-digit input
- Step 5 (if COD): "Confirm cash collected"
 - — Amount preset: ₹<total>
 - — "Received" toggle (mandatory)
- Primary CTA: "Complete delivery" (disabled until all required done)

Edge cases

Scenario	Handling
Wrong OTP (3 attempts)	Call customer prompt; can re-request OTP from backend
Customer unavailable	"Customer unreachable" button → reports to vendor, reschedule flow
Customer refuses delivery	"Failed — customer refused" reason selector
Camera permission revoked	Deep-link to settings + instructions
Photo upload fails	Saved locally, retry in background
Location inaccurate at arrival	Warning + manual confirm

36. Return Pickup

36.1 S-DRIV-RET-01 — Return Pickup Execution

- Similar to delivery flow
- Step 1: Photo of container before pickup (required)
- Step 2: Container condition radio: OK / Damaged
 - If damaged: flag claim (goes to vendor for review)
- Step 3: Confirm pickup
- Deposit refund triggered automatically
- Customer notified

37. COD Reconciliation

37.1 S-DRIV-COD-01 — End-of-Shift COD

- Title: "Cash collected today"
- List of COD deliveries with amounts
- Total: ₹<total>
- Confirmation: "Hand this cash to vendor"
- Vendor confirms receipt in their app → driver sees "Reconciled"
- Mismatch: flagged, both parties notified, needs manual resolution

40. Notifications (All Roles)

40.1 S-COMMON-NOTIF-01 — Notifications Center

Entry from	Bell icon in header
------------	---------------------

Elements

- Header: "Notifications"
- Tabs: All | Unread
- Grouped by day: Today, Yesterday, Earlier
- Each notification:
 - — Icon (role/context dependent)
 - — Title + body
 - — Timestamp
 - — Unread dot
 - — Deep-link on tap
- Actions: Mark all read

40.2 Push Notification Behaviour Table

Scenario	Role	Copy	Sound
Order placed	Vendor	"New order from <area>"	Loud alert
Order accepted	Customer	"<Vendor> accepted your order"	Soft
Order dispatched	Customer	"Your order is on the way"	Soft
Driver arriving	Customer	"Driver arriving in <N> min"	Medium
Order delivered	Customer	"Order delivered. Rate your experience"	Soft
Subscription reminder	Vendor	"You have X subs today"	Medium (6 AM)
Slot reminder	Vendor	"<Slot> begins in 1 hour"	Medium
Compliance expiring	Vendor	"<Doc> expires in <N> days"	Normal
Deposit overdue	Customer	"Return <product> container by <date>"	Normal
Payout completed	Vendor	"₹<amount> credited to your bank"	Normal
New delivery (driver)	Driver	"New delivery — <area>"	Loud alert

41. Help & Support

41.1 S-COMMON-HLP-01 — Help Hub

Entry from	
	Profile → Help OR '?' icon on screens

Elements

- Search: "Search help articles"
- Categories (role-dependent):
 - — Getting started
 - — Orders
 - — Subscriptions
 - — Deposits & returns
 - — Payments & wallet
 - — Account
 - — For vendors (vendor-only)
 - — For drivers (driver-only)
- Popular articles
- Contact support section:
 - — WhatsApp chat (preferred in India)
 - — Email
 - — Call (business hours only)

42. Global Navigation Maps

How screens connect. Useful for understanding flows end-to-end.

42.1 Customer App Navigation

SPLASH → auth check | ▼CUSTOMER HOME (tab) | |→ Vendor detail → Product sheet → Cart → Checkout → Tracking | |→ Orders tab → Order detail → Review / Complaint | |→ Subs tab → Sub wizard / Sub detail / Skip / Pause / End | |→ Wallet tab → Add money / Transactions / Deposits | |→ Profile tab → Edit / Addresses / Notifications / Delete [Cross-cutting: Notifications center, Help, Role switcher]

42.2 Vendor App Navigation

SPLASH → auth check → role picker (if multi) | ▼VENDOR DASHBOARD (tab) | |→ Incoming Order (modal, priority interrupt) | |→ Orders tab → Order detail → Dispatch / Cancel | |→ Catalog tab → Add/Edit product wizard | |→ Earn tab → Order breakdown / Payout history | |→ More → Team / Subs today / Returns / Settings / Compliance / Help [Cross-cutting: Notifications, Role switcher]

42.3 Driver App Navigation
